Leading AI Change: A Guide for the Agile Leader in Artificial Intelligence Transformations

AGILE 2022
JULY 18-22
NASHVILLE

Agenda

AGILE 2022 JULY 18-22
NASHVILLE

- Artificial Intelligence (AI) and Machine Learning (ML) – What you should know about this technology
- AI transformations
- Agile leader's role in AI transformations

Instant Quiz: AI or not AI?

AGILE2022 JULY 18-22
NASHVILLE

1. Movie recommendations from Netflix
2. Personalized welcome page when you log into Amazon.com
3. Paper flyer from your favorite store
4. Expense Report approval
5. Self-driving cars
6. Alert from a medical device
7. Fraud warning from your bank
8. Predicting the SuperBowl winner

ARTIFICIAL INTELLIGENCE (AI):

Any systems (hardware or software) that display **INTELLIGENT BEHAVIOR** by analyzing their environment and taking actions in order to achieve a specific goal

MACHINE LEARNING (ML):

A type of AI that allows software applications to become more accurate in **PREDICTING OUTCOMES** without being explicitly programmed

Why AI and ML?

AGILE 2022 JULY 18-22
NASHVILLE

INCREASED SPENDING

By 2024, global spending on artificial intelligence will reach \$110 billion

—IDC

IDC, "Worldwide Spending on Artificial Intelligence"

FROM PILOTING TO OPERATIONALIZING

By the end of 2024, 75% of enterprises will shift from piloting to operationalizing AI

—Gartner

Gartner, "Gartner Identifies Top 10"

AI TRANSFORMATION

57% said that AI would transform their organization in the next three years

—Deloitte

Deloitte, "Thriving in the Era of Pervasive AI"

Where AI/ML is Used Today

AGILE2022 JULY 18-22

EXHIBIT 4 | A Transformation Approach to Flip the Odds of Success

Winning in the medium term

- Assess the current position of digital and AI in the organization
- Define the target state of value pools and business model in three to five years
- Create a roadmap to develop “unicorns,” use cases with great potential

Funding the journey

- Define the funding needs, free up resources, focus on quick wins
- Embrace agile ways of working for speed and cost-efficiency
- Be willing to divest

Building capabilities

- Unify the entire organization around digital and AI with disciplined change management
- Train and hire digital talent
- Adjust the operating model to enable AI@scale

Sources: BCG interviews and analysis.

EXHIBIT 4 | A Transformation Approach to Flip the Odds of Success

Winning in the medium term

- Assess the current position of digital and AI in the organization
- Define the target state of value pools and business model in three to five years
- Create a roadmap to develop "unicorns," use cases with great potential

Funding the journey

- Define the funding needs, free up resources, focus on quick wins
- Embrace agile ways of working for speed and cost-efficiency
- Be willing to divest

Building capabilities

- Unify the entire organization around digital and AI with disciplined change management
- Train and hire digital talent
- Adjust the operating model to enable AI@scale

Sources: BCG interviews and analysis.

- Promote lean budgeting
- Promote agile teams and team of teams
- Propose agile delivery to fail fast
- Propose specific reports to show value delivered

Agile Leader's Role in AI Transformations

- Adjust the operating model to enable AI@scale

Funding the journey

- Define the funding needs, free up resources, focus on quick wins
- Embrace agile ways of working for speed and cost-efficiency
- Be willing to divest

- Manage training schedules and content
- Promote technical excellence and agile development processes
- Check for compliance/bias/fairness features
- Propose changes as needed to the current processes to enable scalability

Agile Leader's Role in AI Transformations

AGILE 2022 JULY 18-22
NASHVILLE

- Deliver correctly and on time
- Measure everything!
- Create metrics for important KPIs and trends
- Create roadmaps
- Report often
- Provide visibility into the work

AI Product Delivery

The machine learning process is based on the following steps:

- Feed data into an algorithm.
- Use this data to train a model.
- Test and deploy the model.
- Consume the deployed model to do an automated predictive task.

The Scientific Method as an Ongoing Process

The CRISP-DM methodology

Managing the Unknown

AGILE 2022 JULY 18-22
NASHVILLE

Managing the Unknown

AGILE2022 JULY 18-22
NASHVILLE

- **Train** all stakeholders on Agile and ML
- Define your **Roadmap** and **MVP**
- Start **small**
- Use research spikes (heavily)
- Leverage **SMART** user stories

Good Stories:

As an equipment technician, I want to be alerted if the temperature drops below a threshold.

As a website user, I want to see a list of recommended products when I log in.

Bad Stories:

Improve the model.

As a model developer, I would like to tell to stakeholders that their models are noisy and are not very reliable on their own, hence why if we are going to ultimately take a segmentation approach (which we may), we must motivate why we take a more intricate one. *(true story)*

Managing the Unknown

AGILE2022 JULY 18-22
NASHVILLE

- **Build in slack** upfront and throughout
- Keep your stakeholders **informed** of risks, issues and possible scope changes
- Capture and communicate Agile **metrics**
- Practice **continuous improvement**

Measure Everything
