Path to **Agility**® Navigator

One tool to manage your entire Agile transformation journey.

Why choose Navigator?

- **Align teams, systems, and organizations** with a powerful, outcome-driven process that adjusts to your Agile transformation objectives.

- **Gain continuous visibility** into your entire transformation journey– track progress, uncover details, and identify impediments.

- **Communicate and demonstrate progress** with key stakeholders using data-driven visualizations, kanban boards, and live dashboards.

- **Focus on prioritized action items** that directly impact desired business outcomes.

- **Work the way you need to**; Path to Agility is framework agnostic and complementary to any Agile transformation framework including Kanban, Scrum, and SAFe®.

Too many organizations struggle to achieve their goals for Agile transformation.

It's easy to feel lost in a transformation journey.

Maybe you're missing buy-in from vital stakeholders, or alignment across the business.

Perhaps what you've tried isn't working, you're uncertain about what to prioritize, and there's no visibility on where you are now or where to go next.

We built Path to Agility® Navigator to solve this problem.

Let's talk: info@pathtoagility.com

The cyclic diagram shows the following stages around the wheel:

- **ACT** — Kanban
- **EVALUATE** — Path to Agility Assessment
- **VISUALIZE** — Path to Agility Map
- **ANALYZE** — Map Drill Downs
- **PRIORITIZE** — Transformation Backlog

How does Navigator work?

Evaluate the status of your transformation with a consistent assessment process

Visualize status with an interactive, data-driven map that correlates Agile practices with business outcomes

Analyze transformation efforts with drilldowns and dashboards that deliver actionable insights
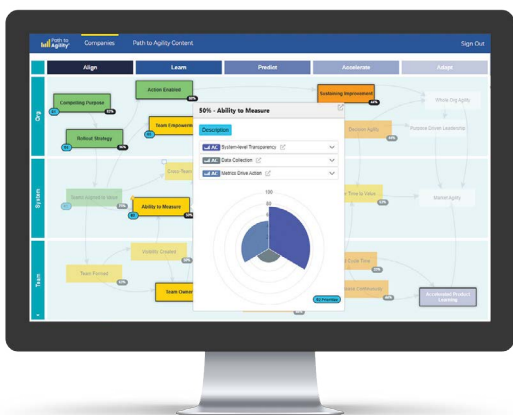

Prioritize actions you should take to maximize impact on your business goals

Act on tasks that are coordinated in Kanban boards and use connected dashboards to track transformation progress

Path to Agility® Navigator is a software tool designed to assess, measure, and provide visibility into your Agile transformation across the enterprise.

It gives clarity and focus on the actions needed to successfully manage Agile transformations, enables you to prioritize and track progress on those actions, and delivers measurable business outcomes.

Unlike basic assessment tools, Path to Agility Navigator gives more than just a picture of where you are now; it shows you where to go next.

It uses a powerful, scalable, outcome-driven process to manage your entire Agile transformation in one tool. The Path to Agility approach drives Agile journeys toward impactful business outcomes in the shortest time possible.
