# ScatterSpoke

## Driving Meaningful Improvement through Retrospective Data

Organizations have to **proactively find and fix issues** preventing teams from delivering the best software and product.

ScatterSpoke **leverages unique AI powered algorithms** to extract insights from feedback that teams gather in retrospectives.

Collect thoughts, ideas, concerns, and future action items as each sprint happens while staying completely anonymous.

Automatically track teams sentiment, themes, and topics most mentioned, as well as Overdue Action Items.

ScatterSpoke

Key Features

Data Driven

Ground your retros with Facts & Stats. Bring in key petrics and team delivery data by integrating with the tools your team is already working in.

Active Accountability

Don't let action items get lost. Set reminders, due date, owners, and export items into the tools your team uses every day.

The Big Picture

Connect the dots across teams to show patterns at all levels of your organization so leaders can address issues that arise.

Real-time Visibility

Without data, leadership is flying blind about delivery and team health. Our reporting provides visibility and opportunity without being "big brother."

Machine Learning

Every organization's goal is to surface issues before they happen. Our machine learning links together unique indiccators to signal when to take proactive steps to keep teams on track.

Identify and improve the important stuff sooner.
