

Crack the Code to Agile and DevOps Success

15th State of Agile report shows 95 percent of organizations have implemented Agile methodologies, while 76 percent have implemented DevOps.

However, multiple questions still loom -

- Is my release ready to go on time and with quality?
- How do I measure compliance across my pipelines?
- I still can't increase efficiency, what gives?
- How do I optimize my cloud costs?
- Incidents to root cause, can I automate the journey?

The path to Agile and DevOps success is paved with several impediments:

- Lack of unified visibility** due to data silos resulting from multiple disparate tools
- Homegrown solutions** are resource intensive and difficult to adapt/maintain
- Inconsistent usage** of tools or non-compliant processes introduce risks and hinder traceability
- Many point solutions** exist however, they don't adapt to existing processes

Enterprises need unified visibility, self-service analytics, interactive workflows, and intelligent automation to overcome these challenges.

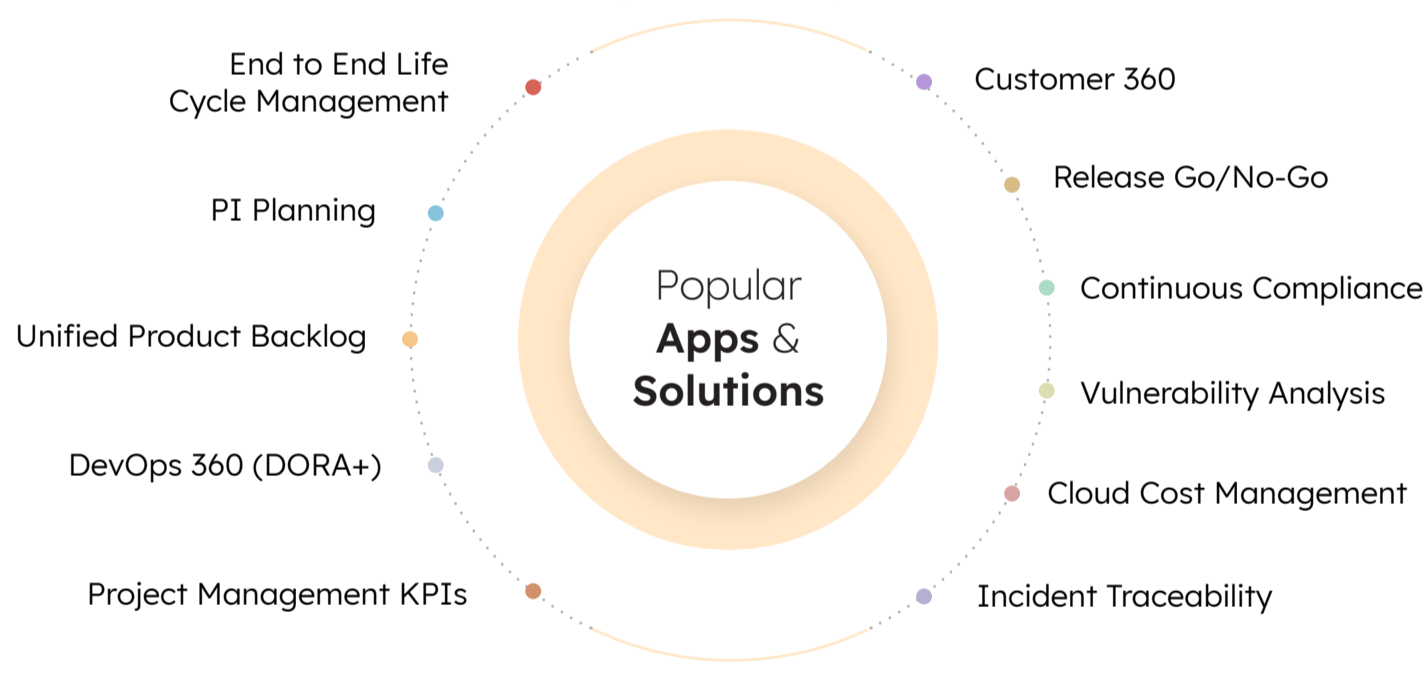

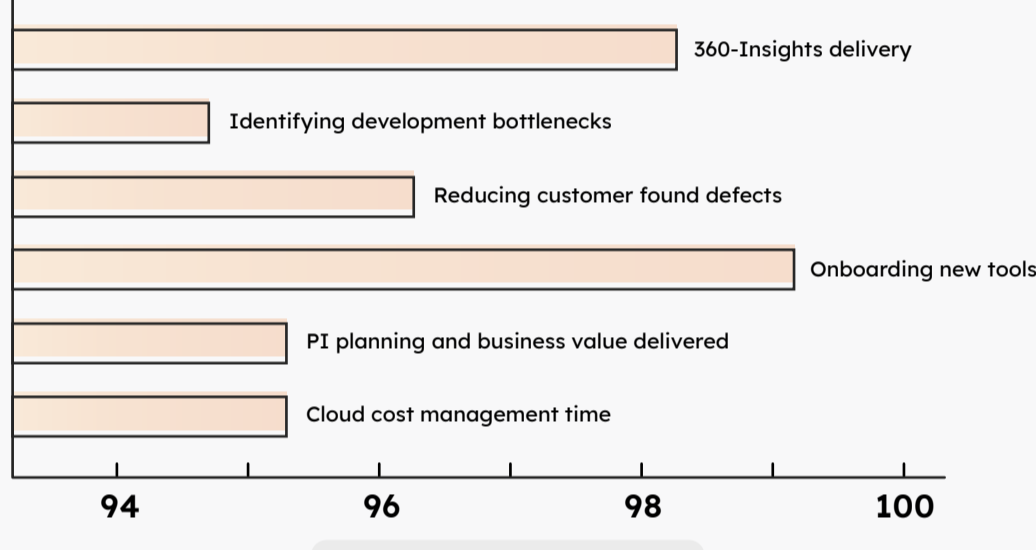

Accelerating Time to Value for Businesses by 20X

Klera's ready-to-use apps and connectors for analytics, and workflow automation enable Agile and DevOps practitioners to instantly realize 20X value as proven across Fortune 500 businesses.

Delivery leaders, Product Managers, Quality and Reliability Engg. teams, Agile Coaches, SREs and other stakeholders seamlessly span the journey from awareness to intelligence and actions **across any tool or any process without any coding.**

Value Delivered Across Industries

Klera is a unique no-code platform that enables business users to solve a variety of simple and highly complex use cases.

How Klera Delivers Value

- Workflow Automation** using form-based templates, triggers, and alerts
- Insights Delivery** with ready-to-use apps & templates offering contextual navigation across tools
- Data Collection & Synchronization** with 100+ out-of-the-box bidirectional connectors
- Automated ETL** without a need to create a data lake or data mart to get started
- Built-in Excel like formula engine** for custom KPIs, clustering, sentiment analysis etc.
- AI/ML capabilities** for advanced and predictive analytics. Create new models or bring your own

Our Clients and Partners

Fortune 500 global organizations spanning Retail, Semi-conductors, Automotive, Cloud Communications, Financial Services, Healthcare, Media and more.

Klera™ is a software products and services company focused on creating solutions that deliver intelligence from data, unlike ever before.
