PRESENTS

Agile ORLANDO
JULY 24-28 **2023**

#AGILE2023

**THE UNDERCOVER
SCRUM MASTER
RETURNS**

INTRO & ASSUMPTIONS

DANE'S UNDERCOVER MISSION

PREVIOUS EXPERIENCE

- Philosophy & Clinical Psychology
- Business Analysis, Support, Account Ownership
- Product Owner & Scrum Master
- Agile Coach

THE MISSION

 E-Verify 

 Big Sillies  Faux Pas  Bits, Please!

THE RETURN

- Technical Agile Coach
- Engineering Manager
- Software Developer (again)

BASELINE ASSUMPTIONS

AGILE MANIFESTO

Agility > ~~Efficiency~~

HUMANITY AND BEING HUMANE

SUSTAINABLE PACE

CROSSING THE TECHNICAL DIVIDE

You don't need to spend two years programming.

KEYS

Collegiality -> Empathy -> Curiosity -> Advocacy ->
Challenge

COLLEGIALITY

collegiality

1. working with colleagues in an effective and cooperative manner
2. power and authority that is shared among peers

Muggles vs Wizards (Technical Mysticism)

Programmers are architects, not crane operators

Naming is hard, but words matter

Equality & Mutual Respect

Caring about the same thing: racing team

ACTIVITY:

write out one thing you can change that you've done in the past to reinforce the technical divide.

Leave it for me at the end of the talk.

EMPATHY

empathy

1. Identification with or understanding of the thoughts, feelings, or emotional state of another person.
2. Capacity to understand another person's point of view or the result of such understanding.

Understanding the programmers

Cognitive load and all the tech required

The joy of code

ACTIVITY:

Create the longest word you can, such that you can repeatedly remove a single letter and still have an English word.

For example:

- chat
- cat
- at
- a

Thinking vs. typing

Feedback loops

CURIOSITY

curiosity

1. the tendency to ask and learn about things by asking questions, investigating, or exploring.

Don't be afraid

Look at the code and ask about it

ACTIVITY:

Read some code.

Growth mindset and the cross-bar of the T

Layers of an onion: you don't have to be an expert to appreciate and learn about - another layer

Learn to draw the architecture

Heroku

Contentful

Web
Vercel

API
Heroku

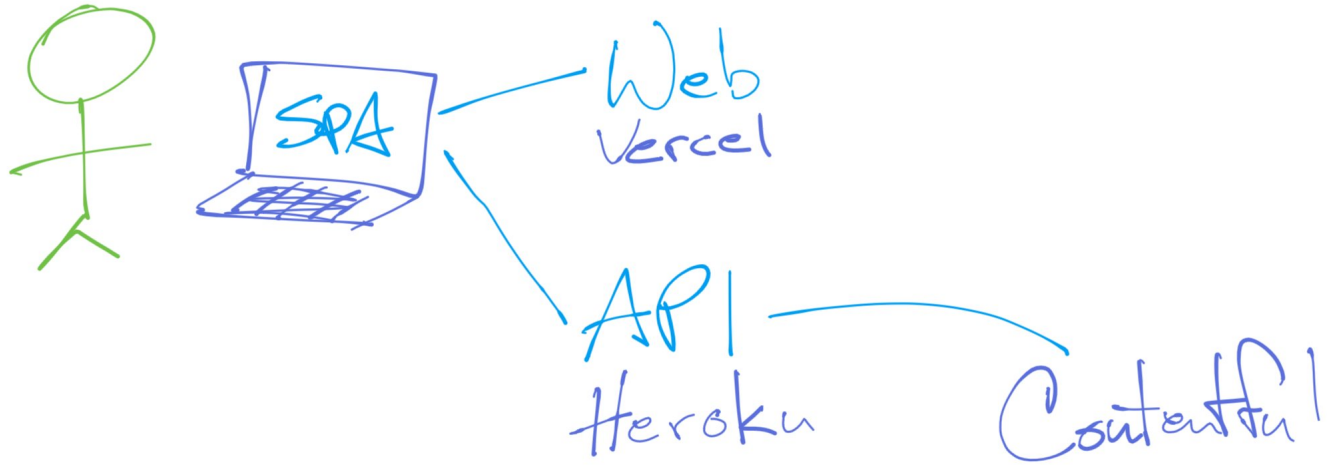

Contentful

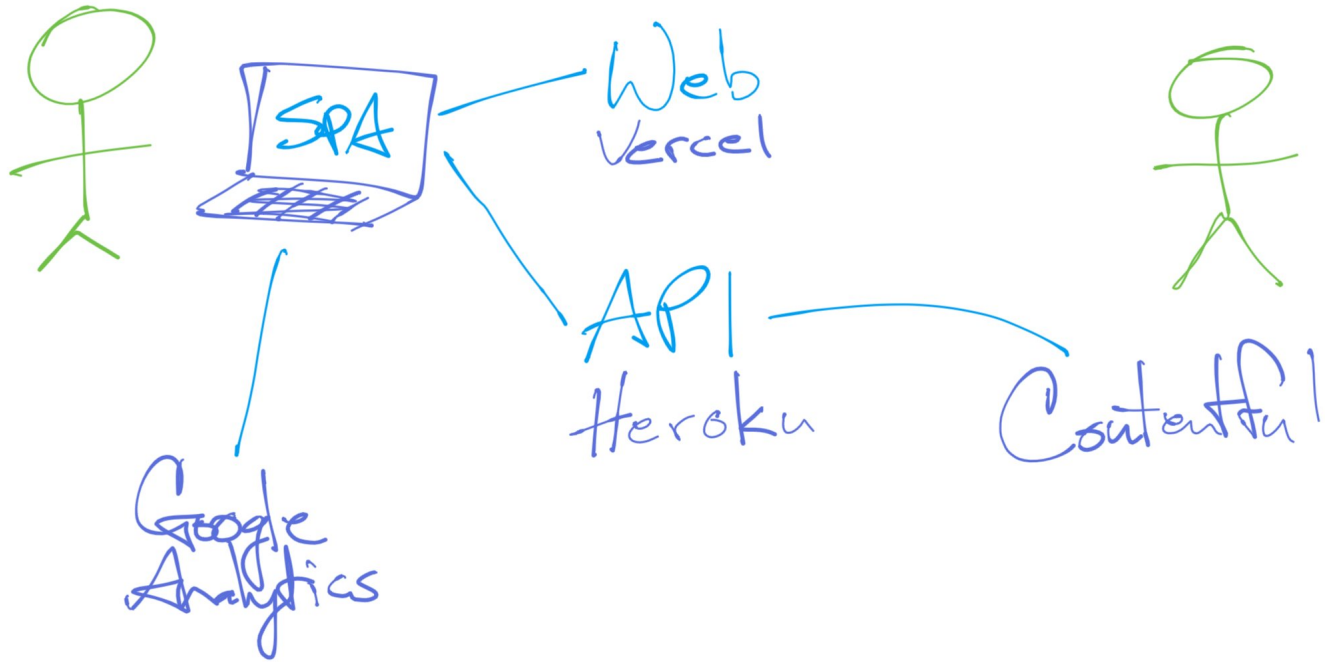

Web

API
Heroku

Contentful

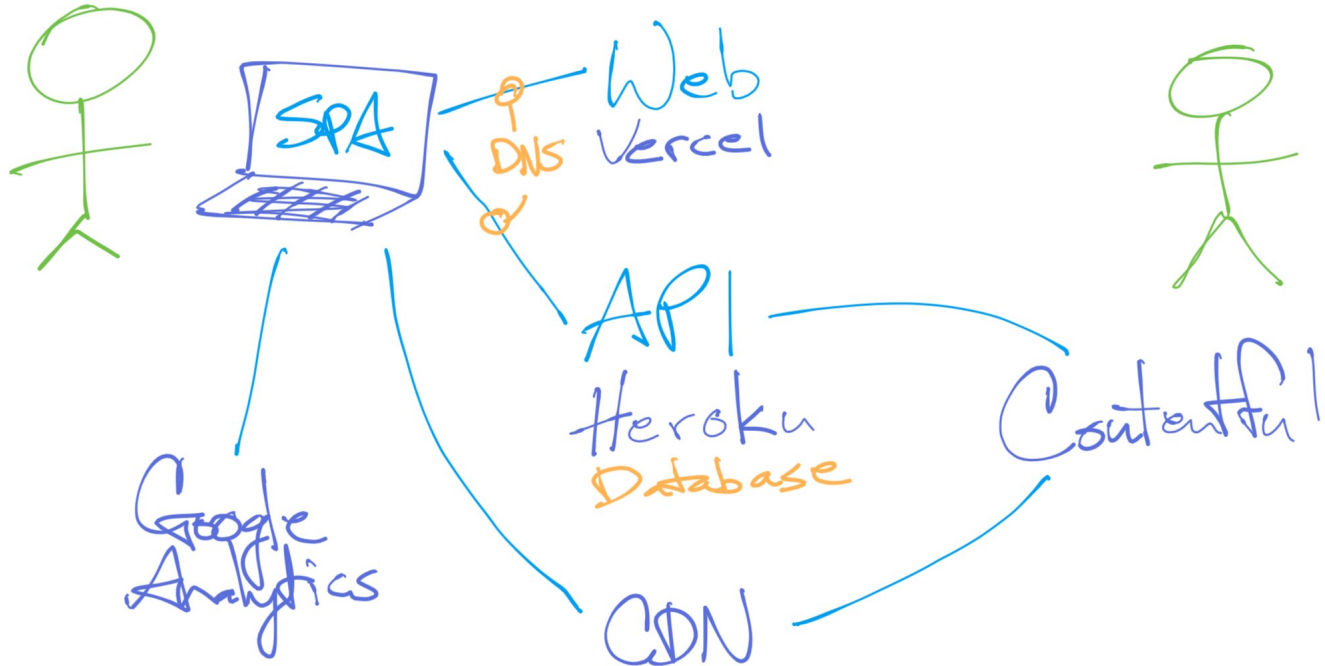

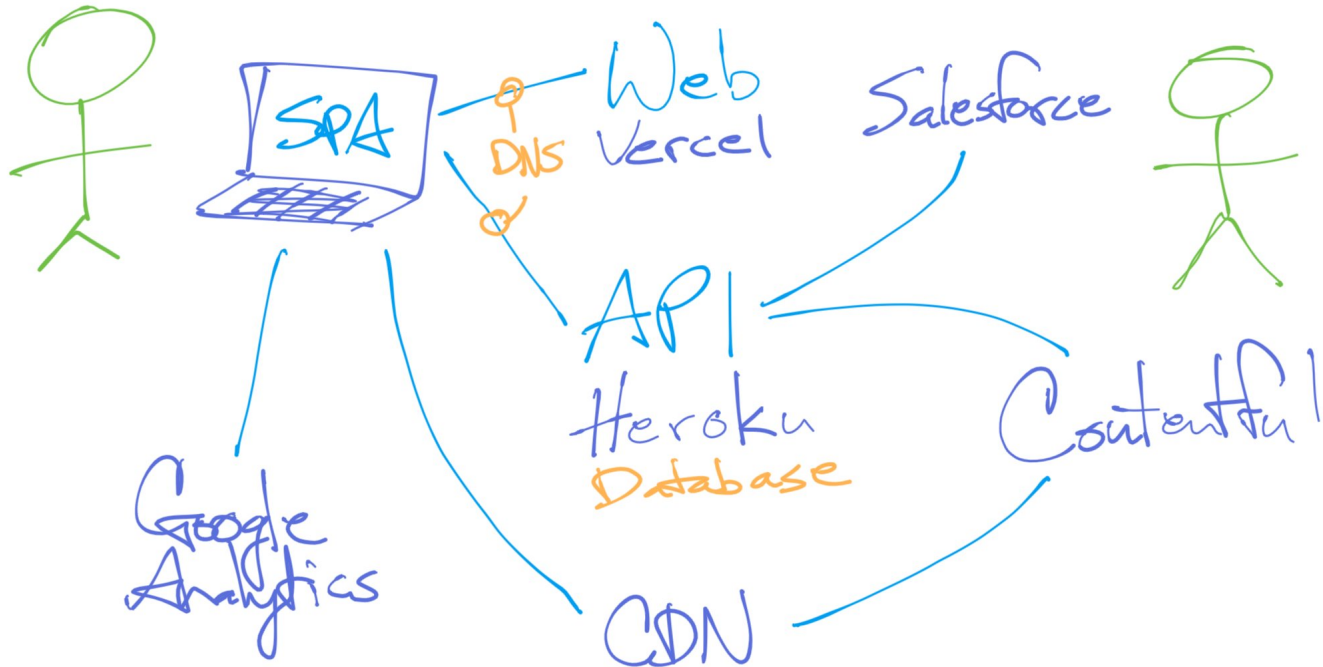

ADVOCACY

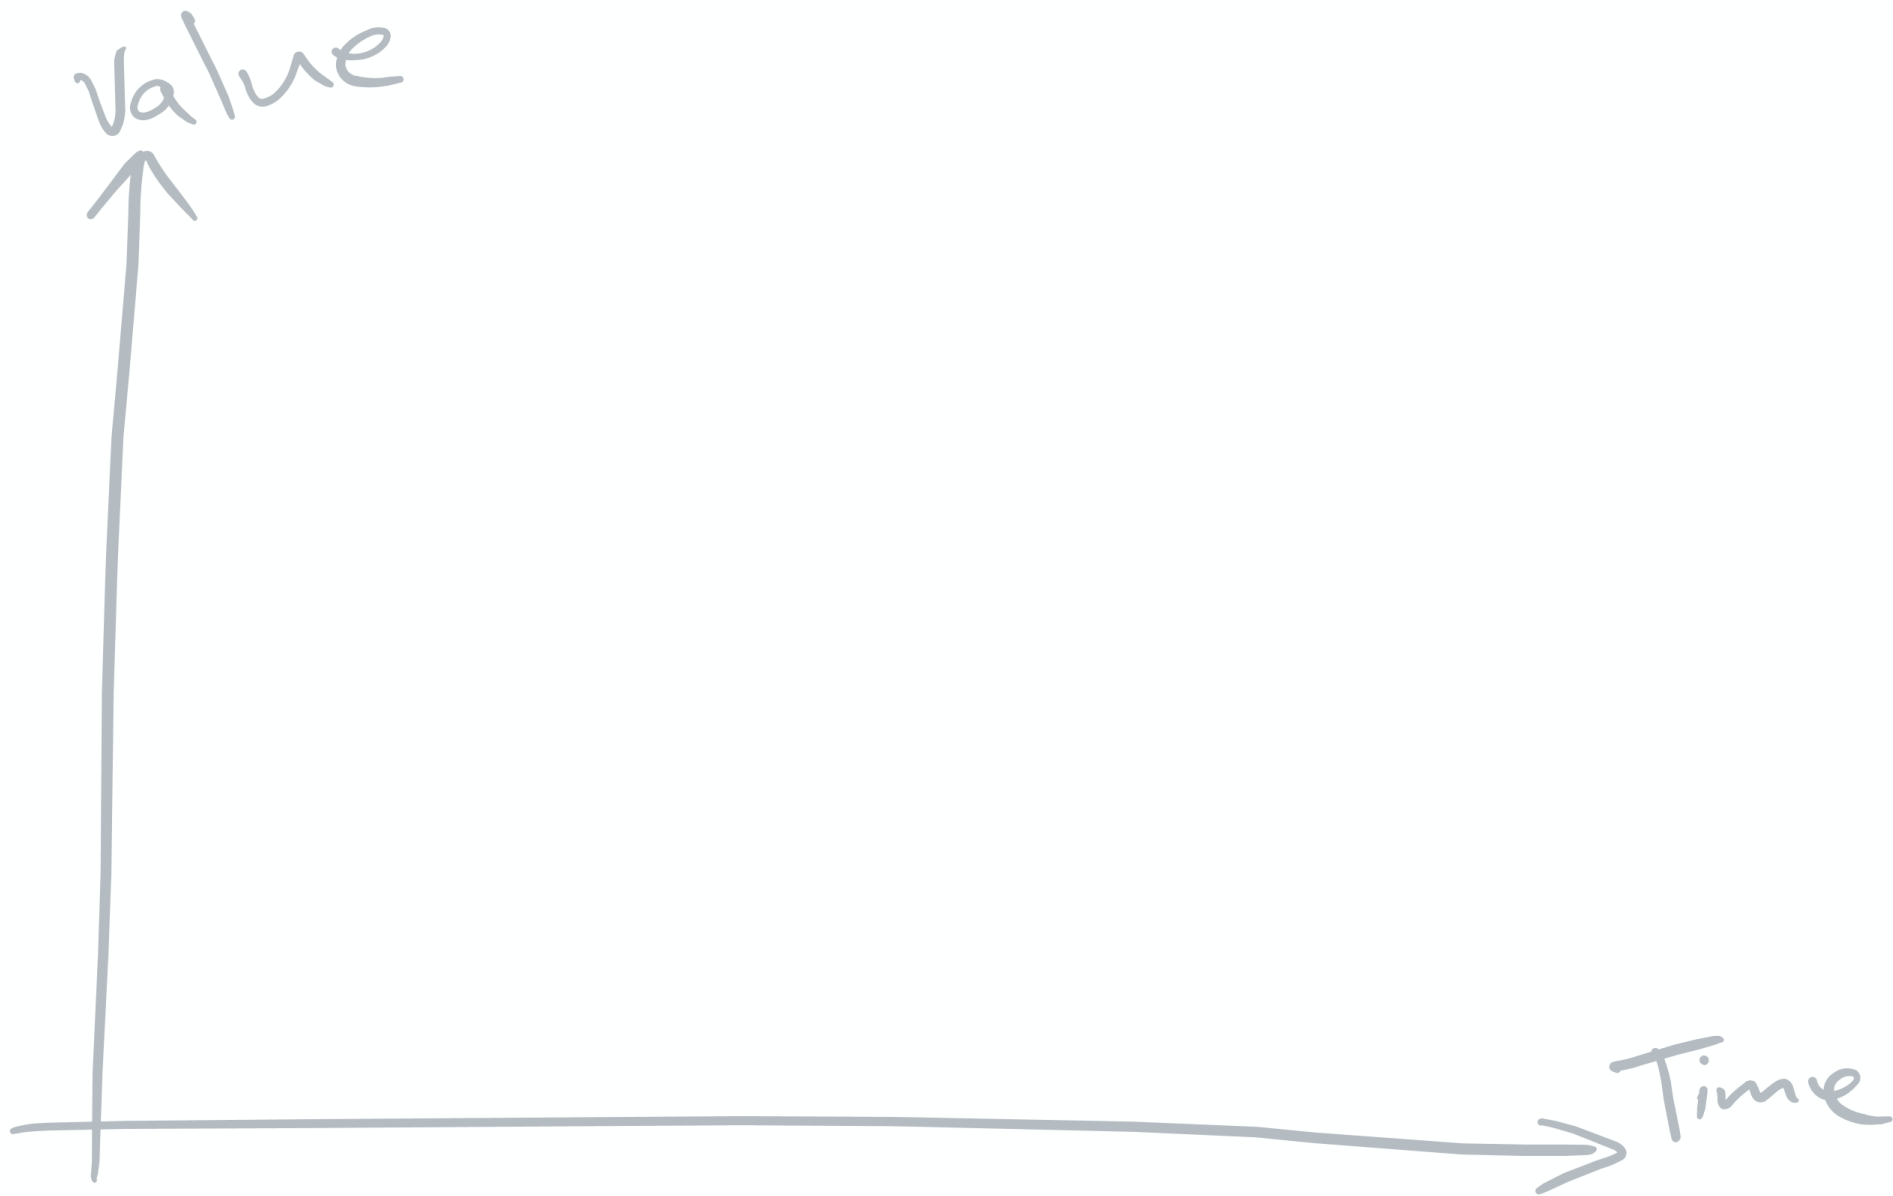

advocacy

1. The act of arguing in favour of, or supporting someone or something.
2. The practice of supporting someone to make their voice heard.

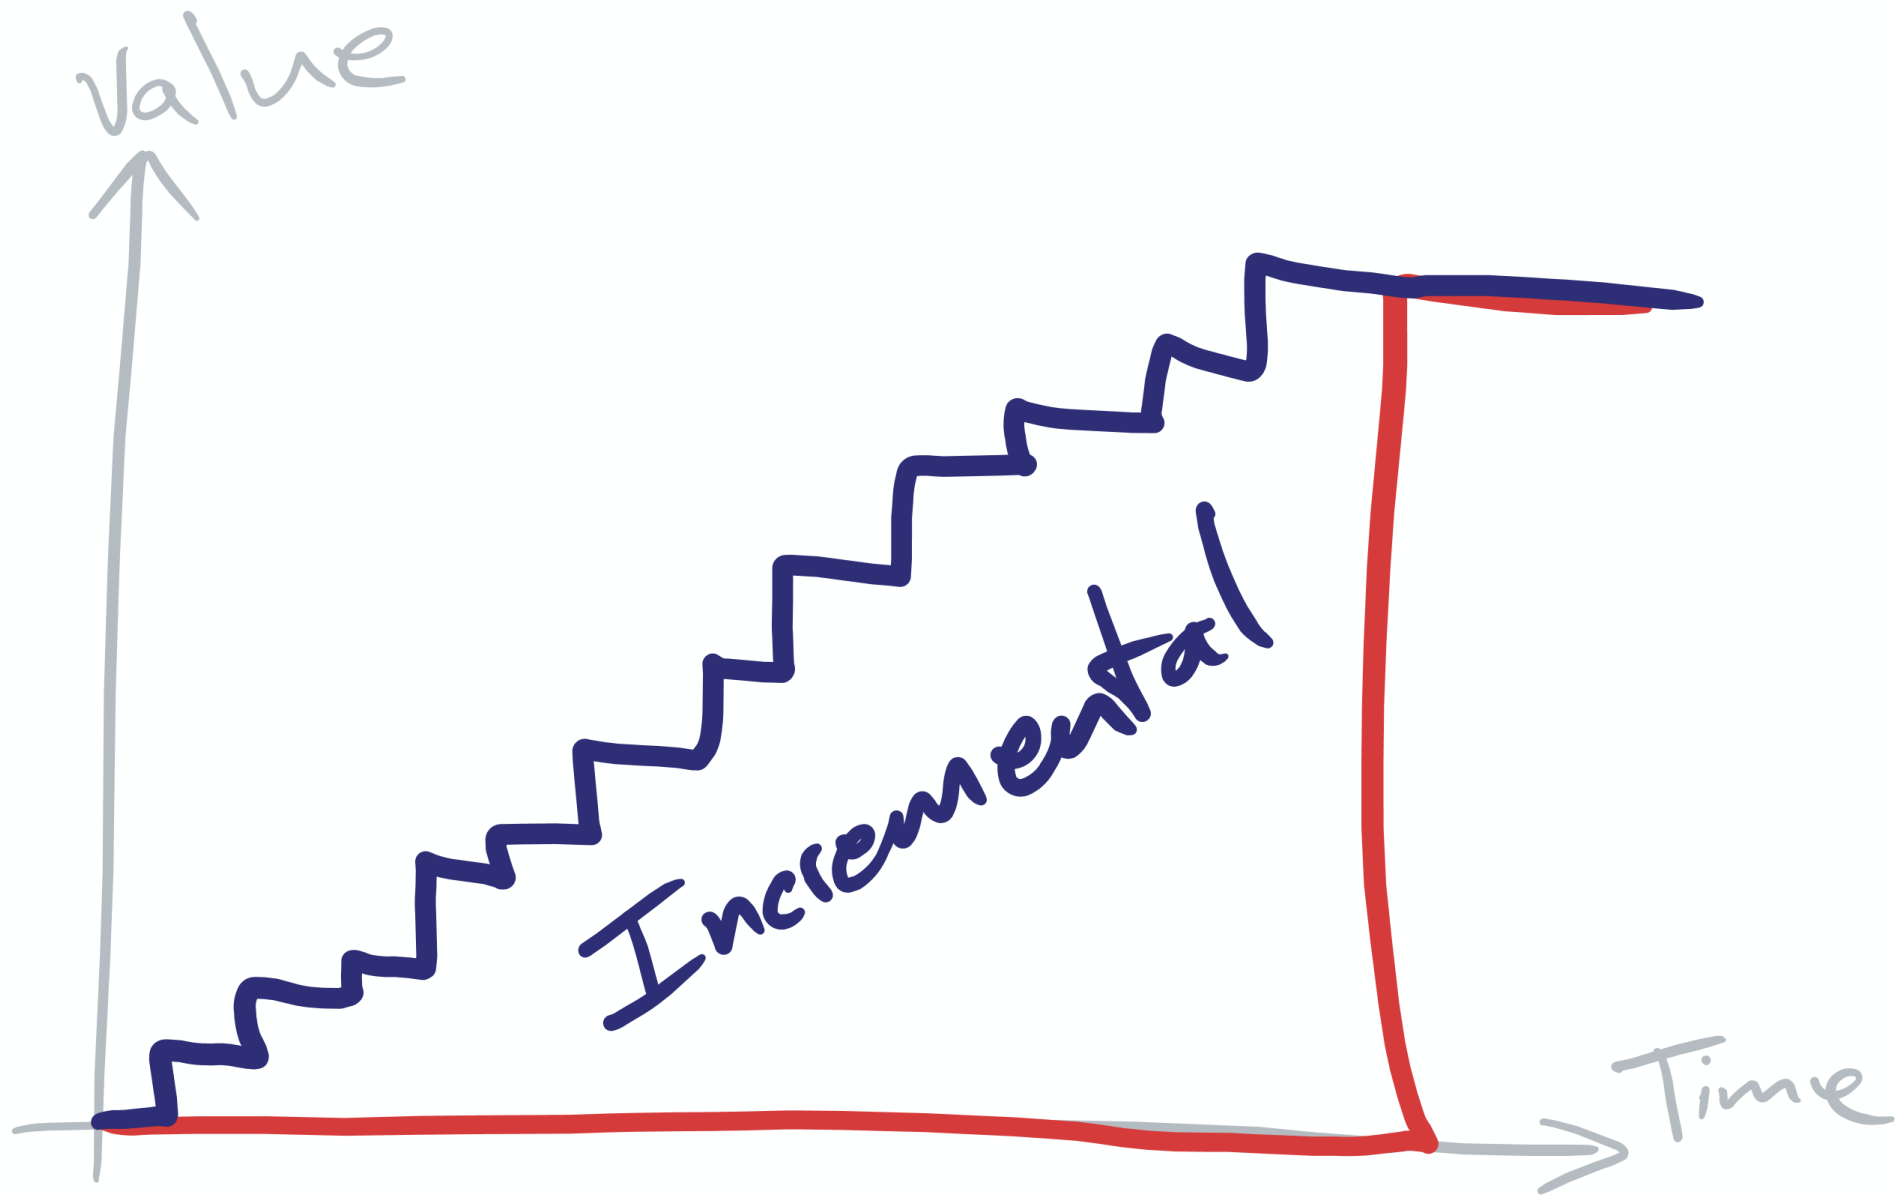

DO MORE, FASTER

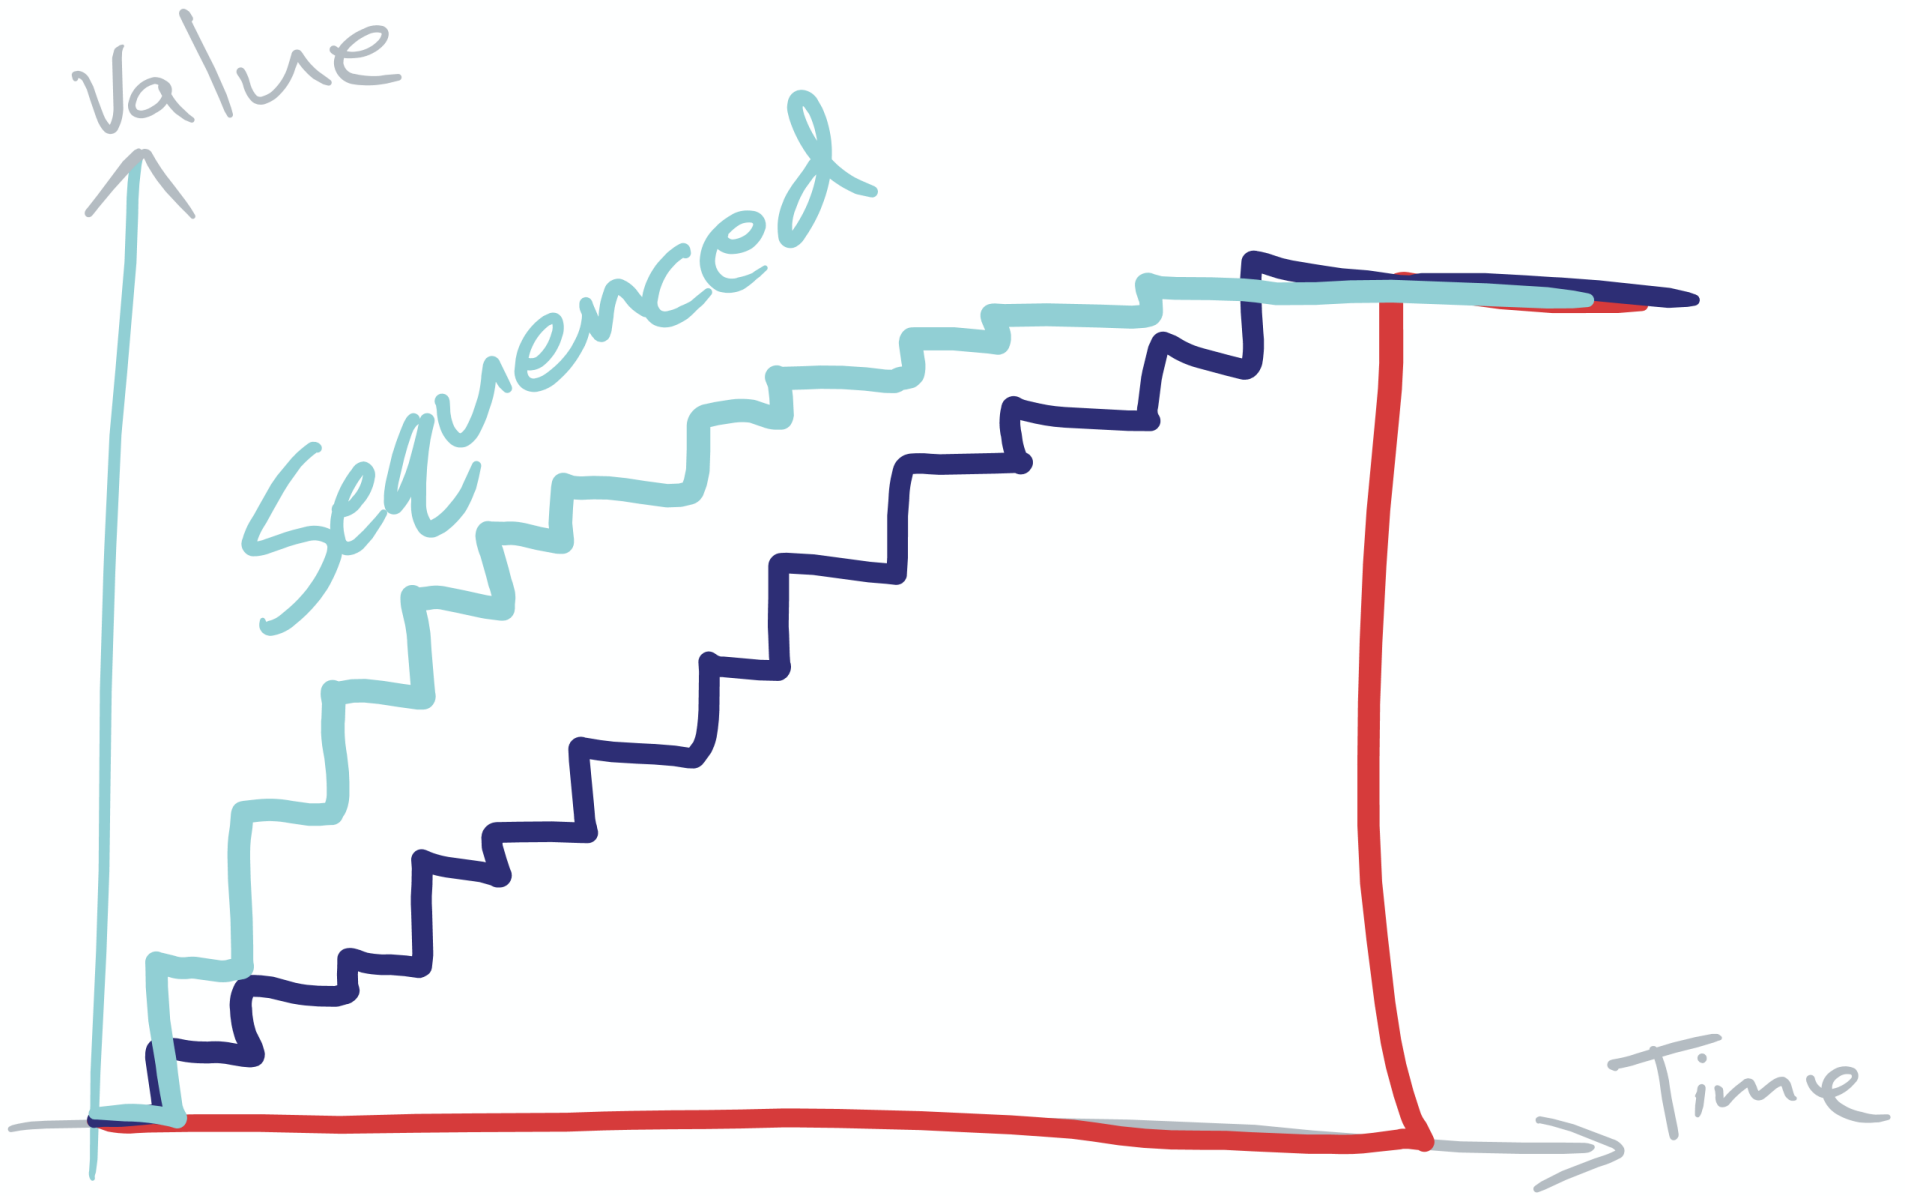

Value

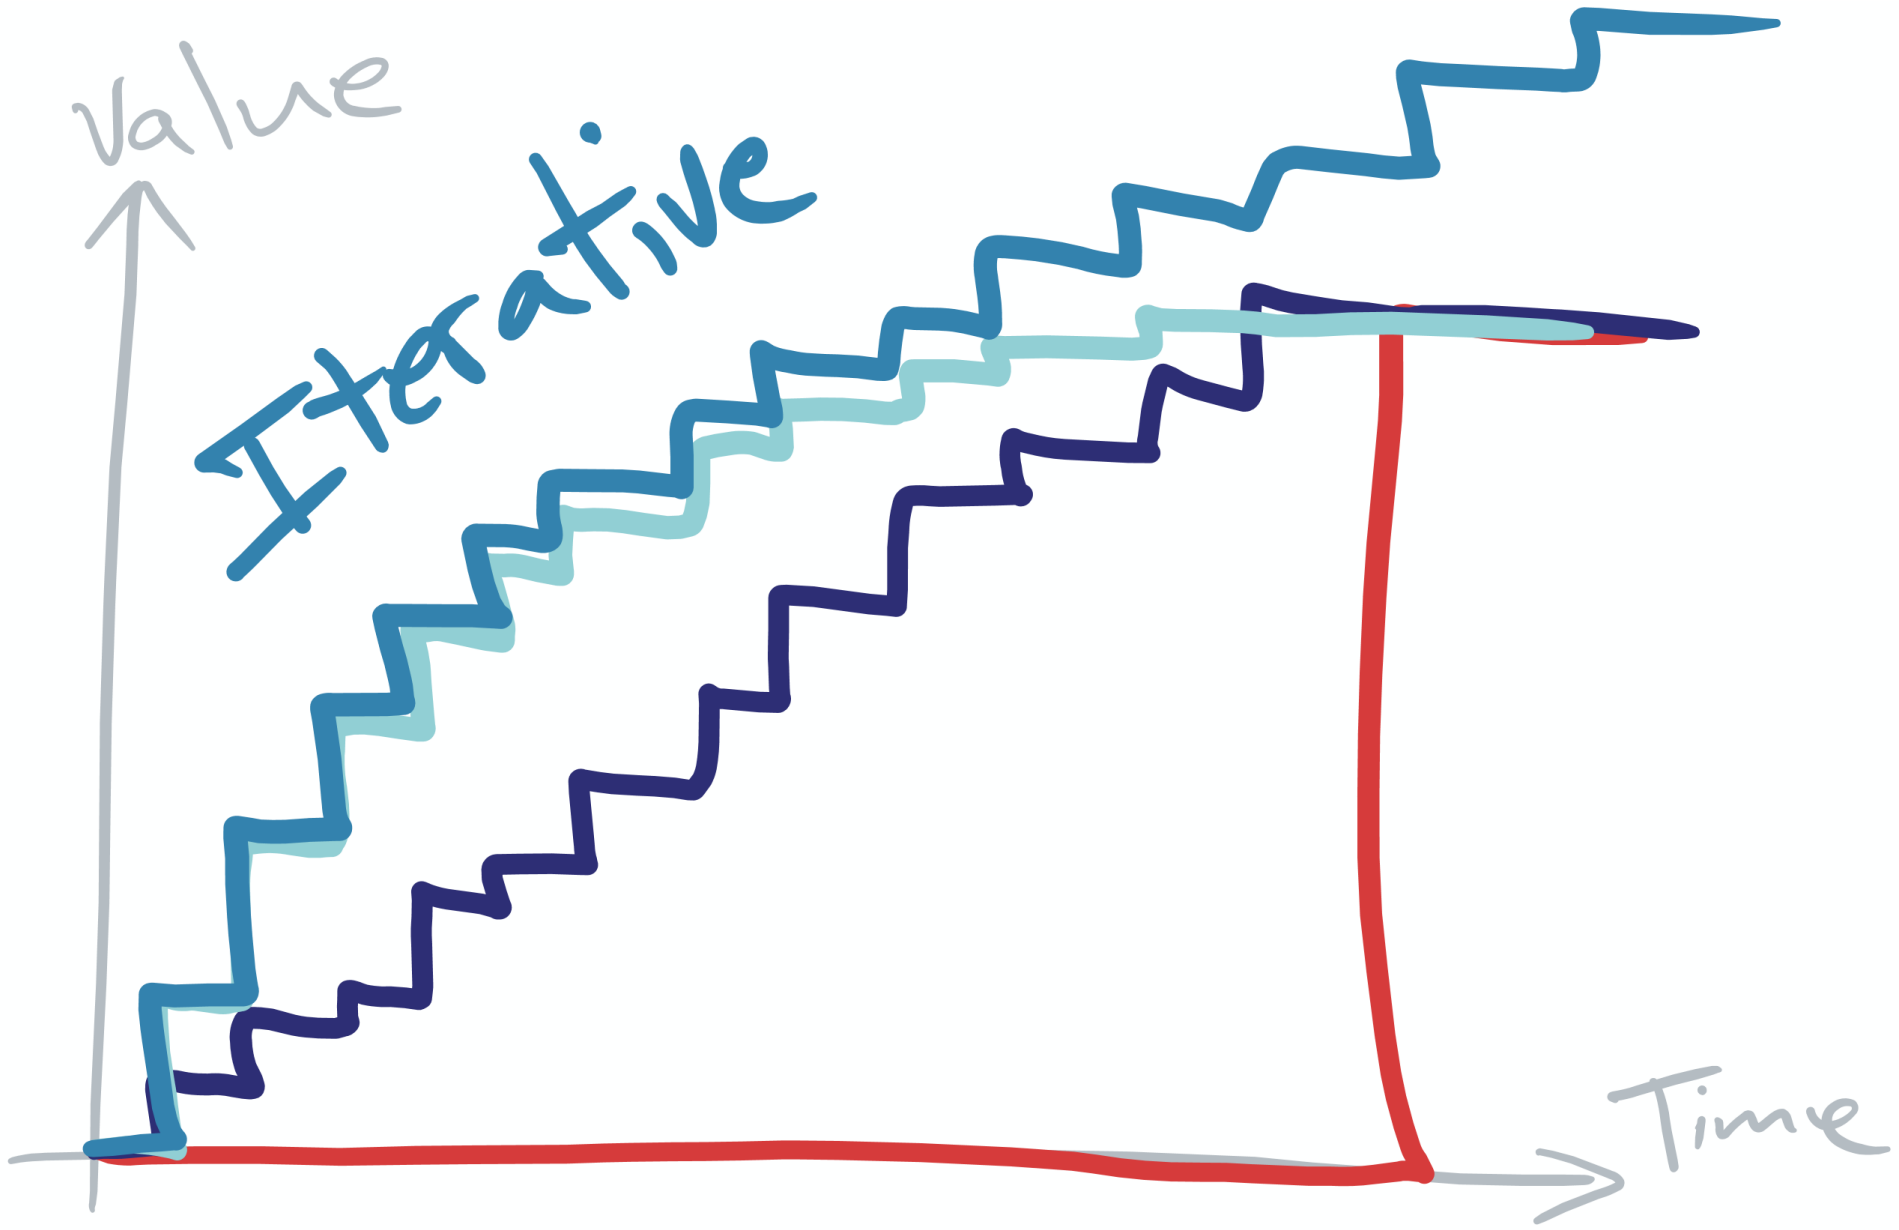

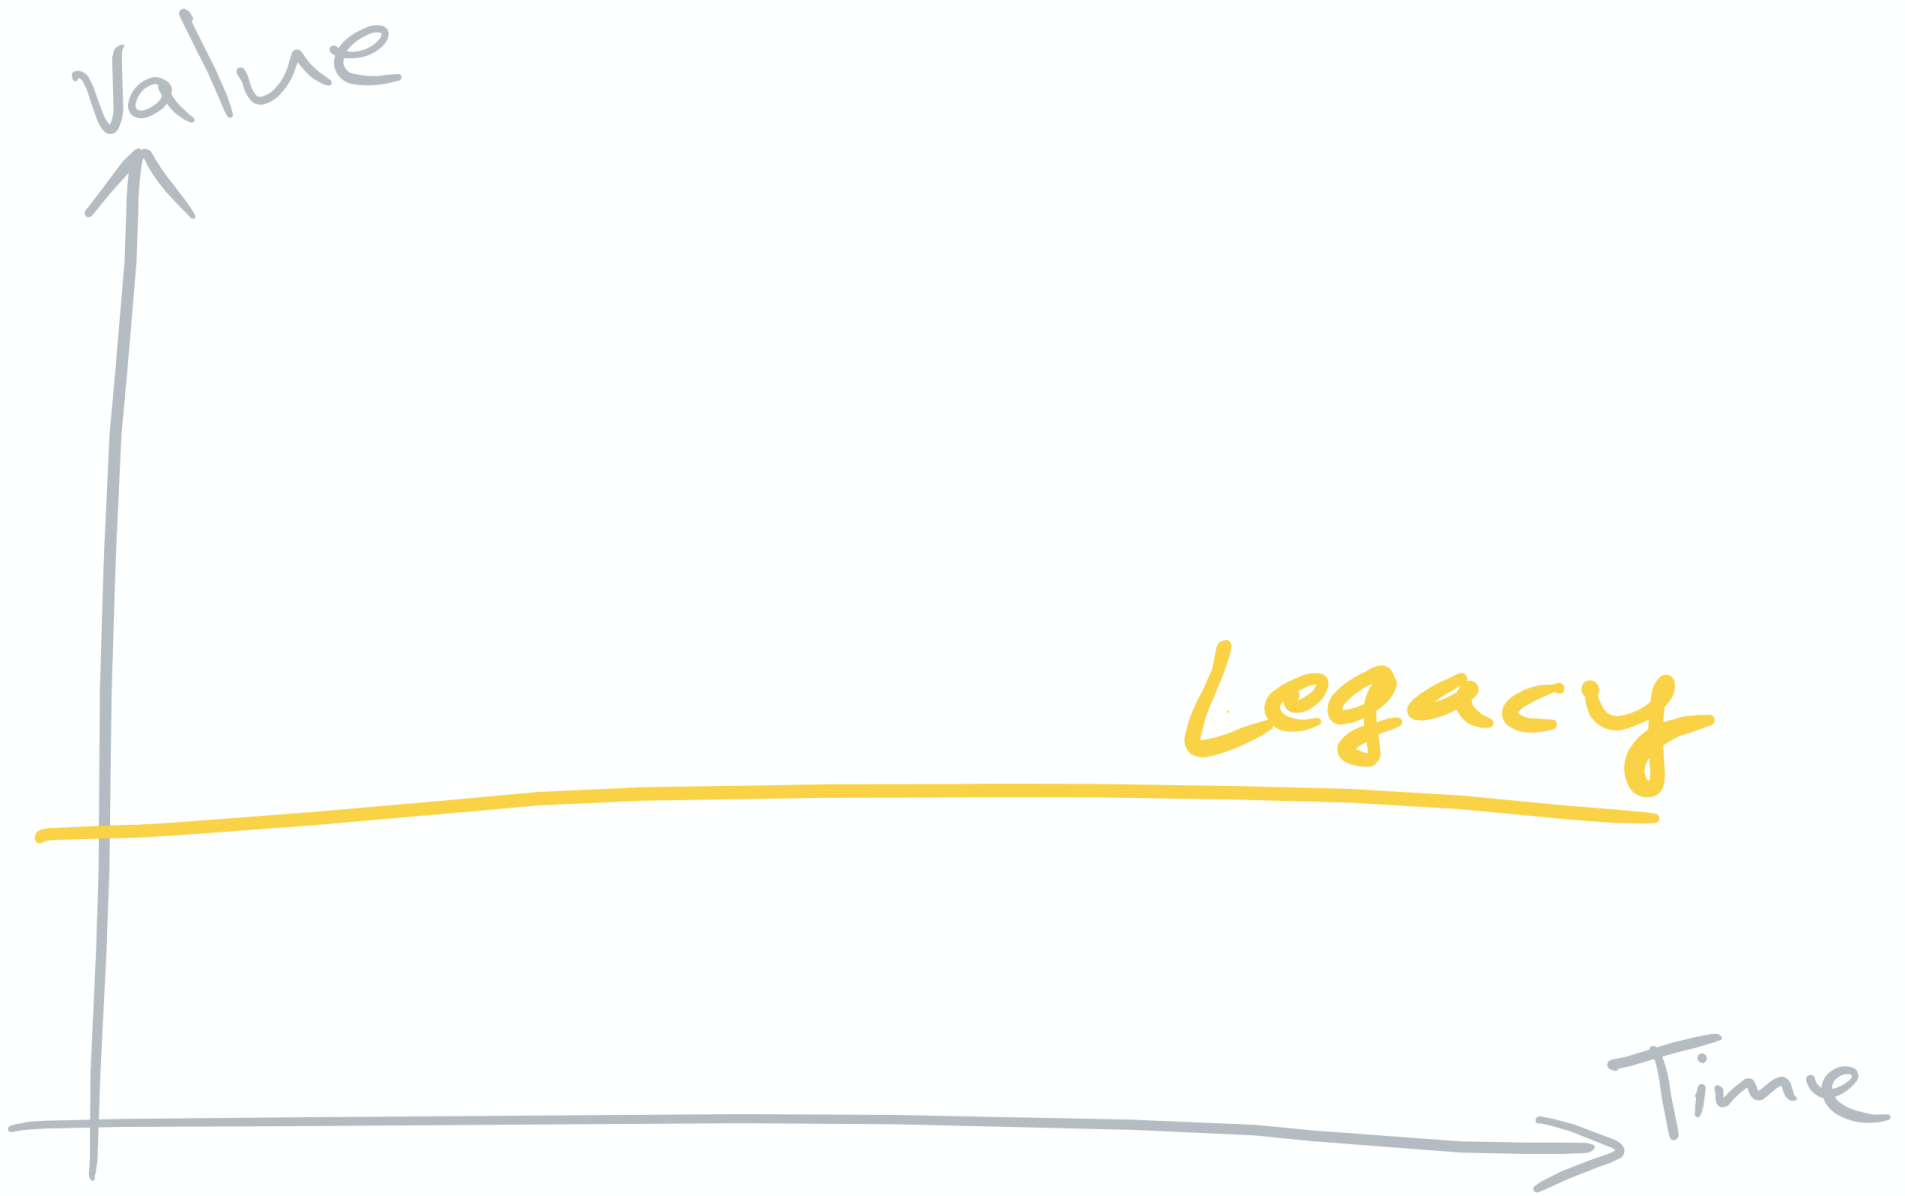

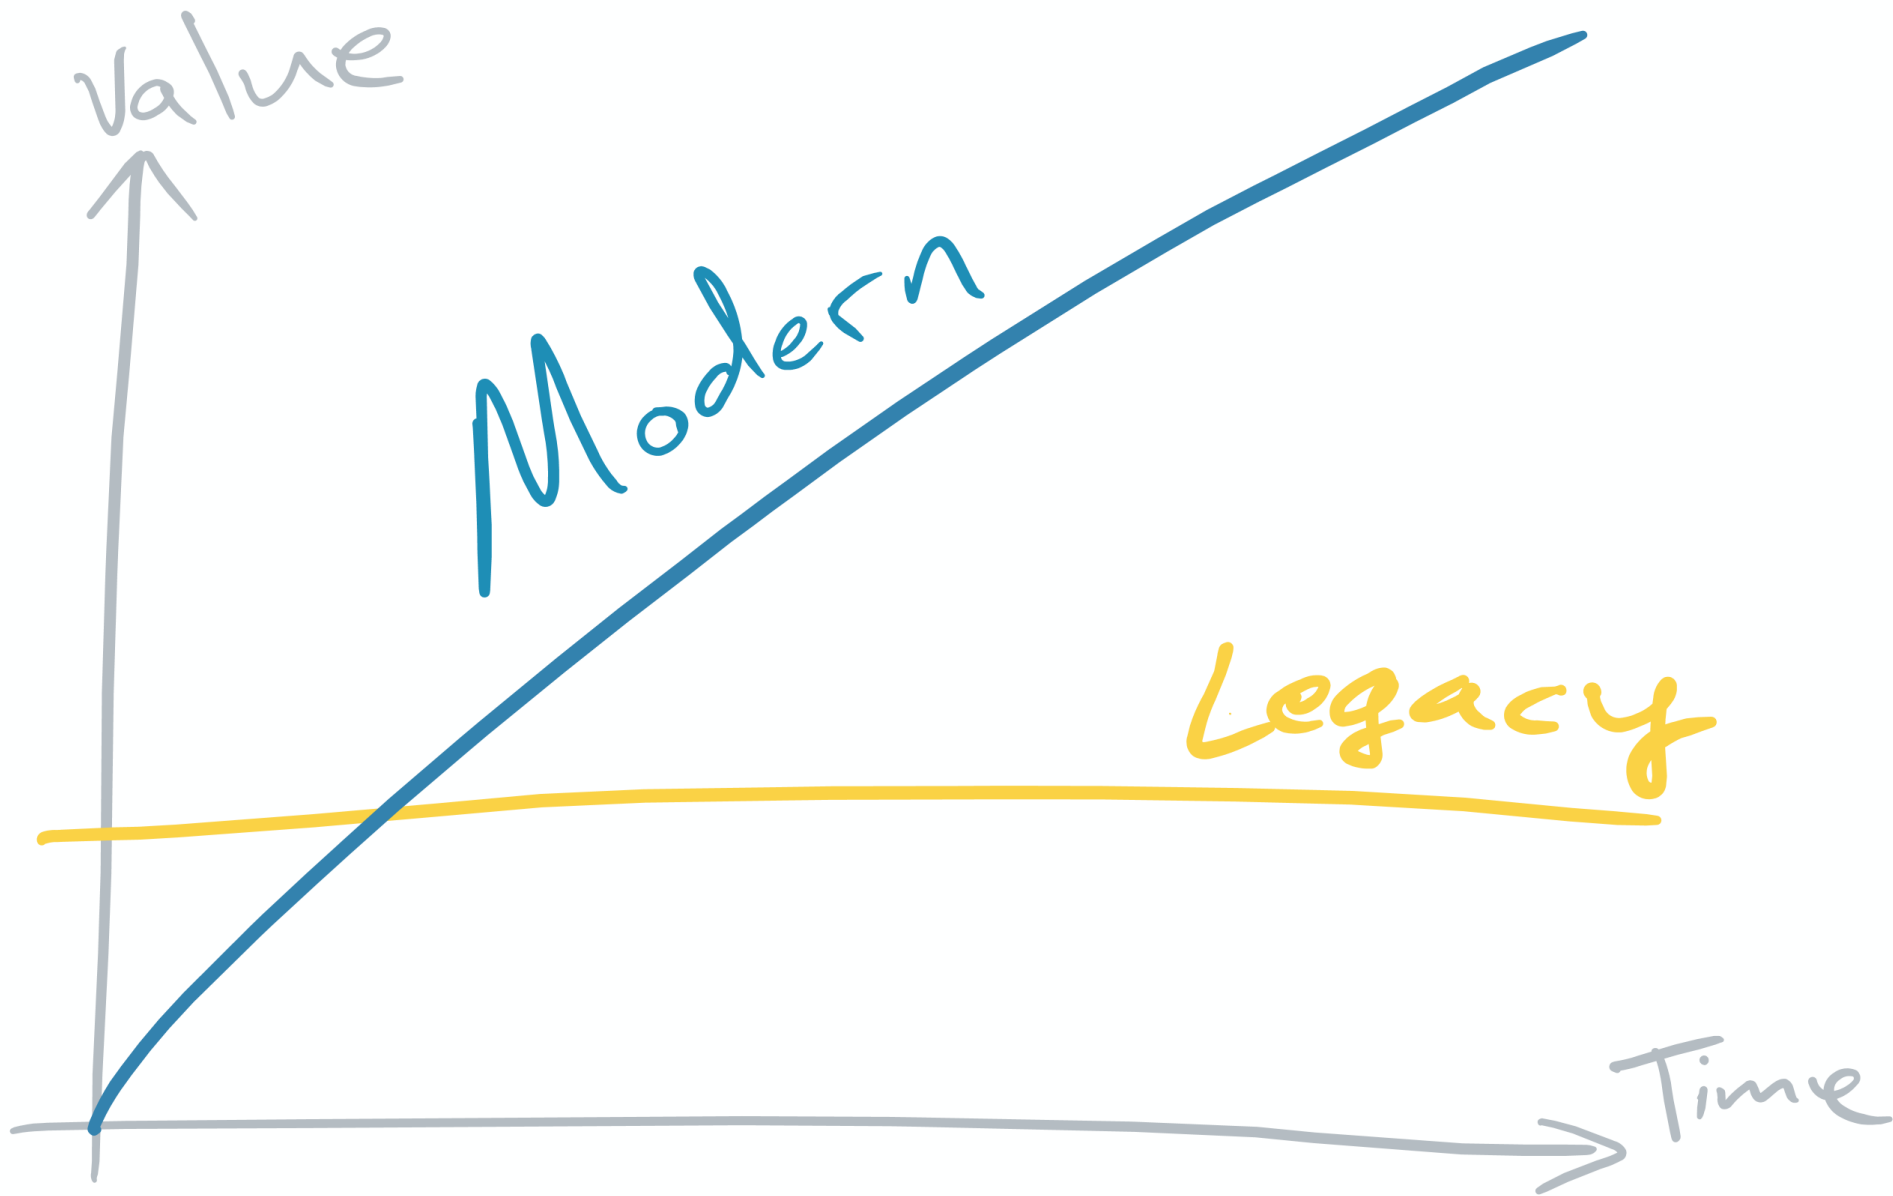

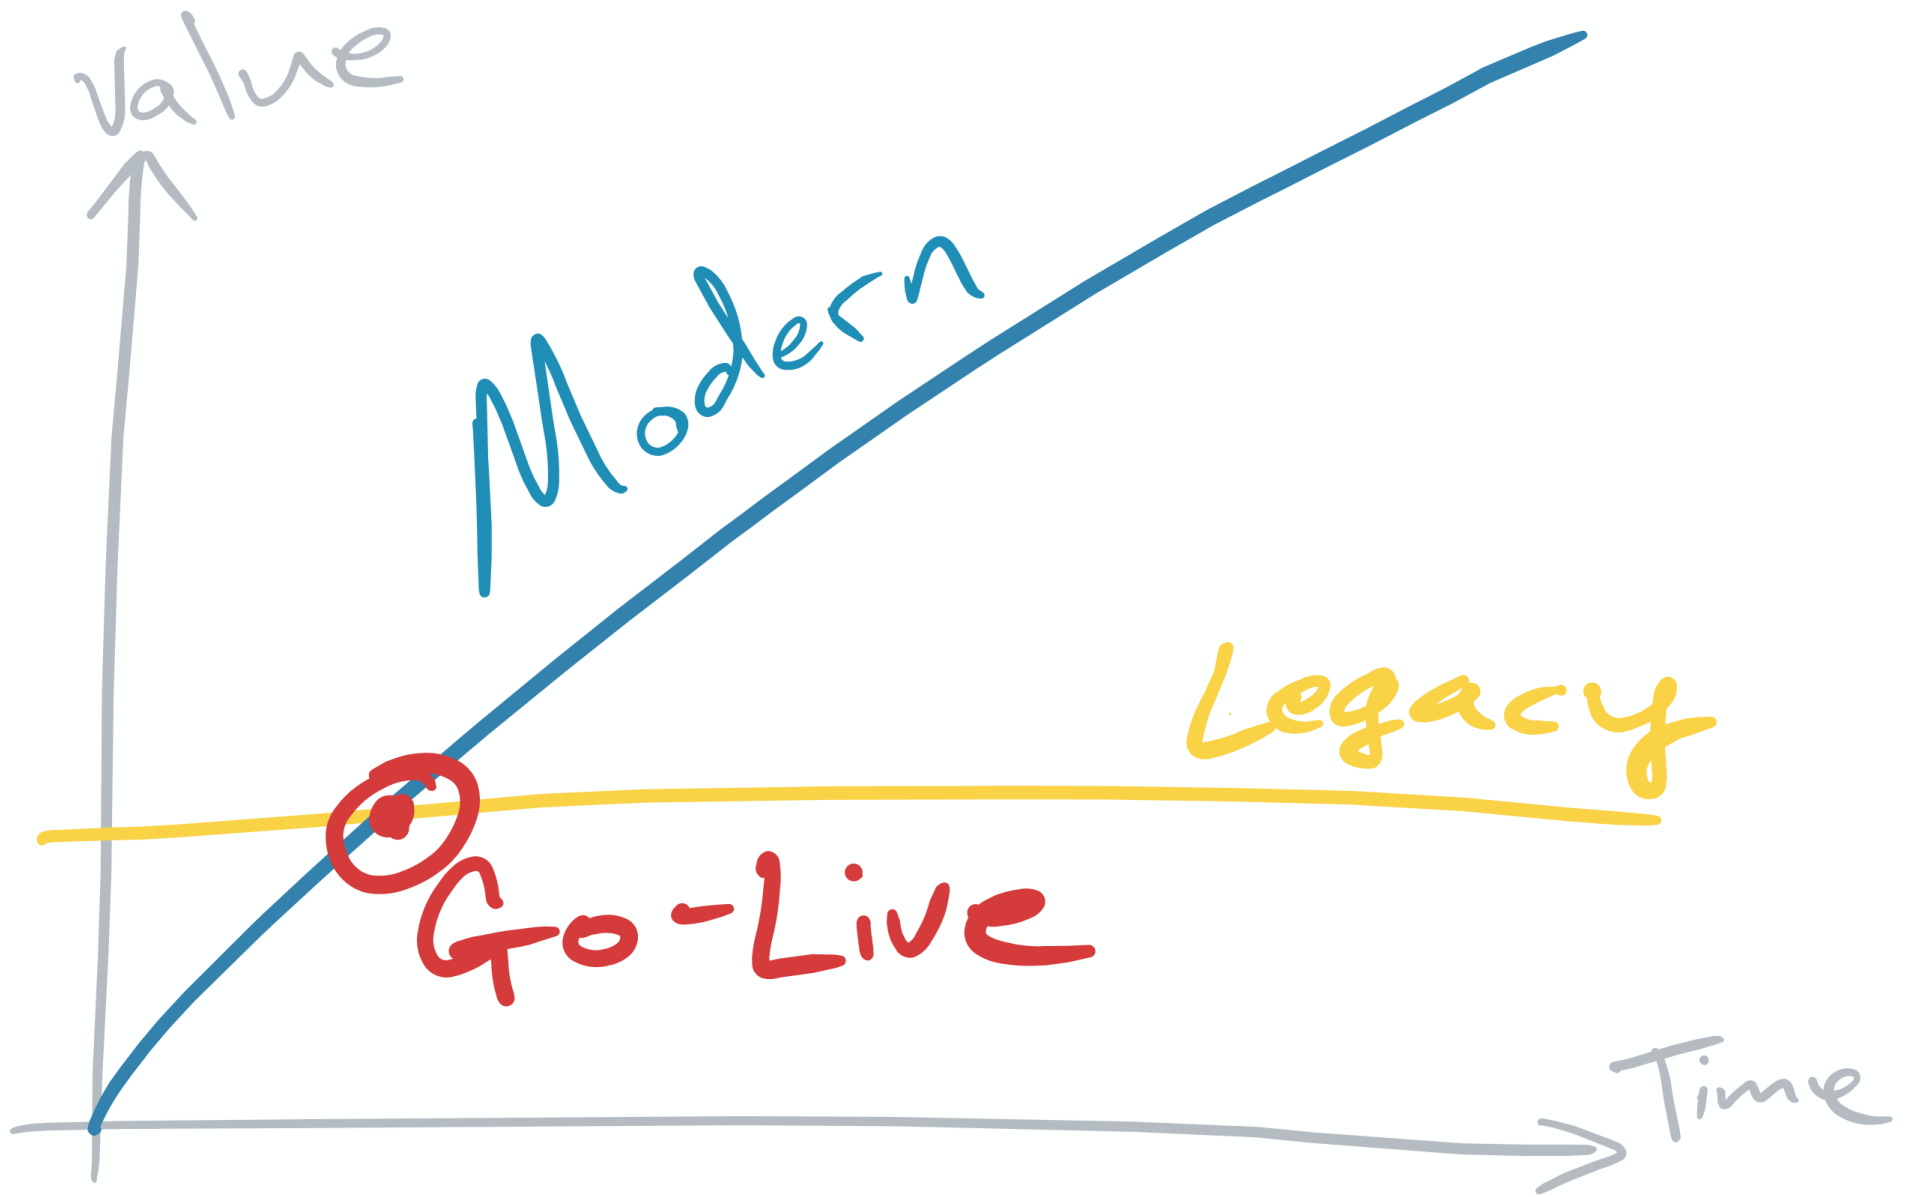

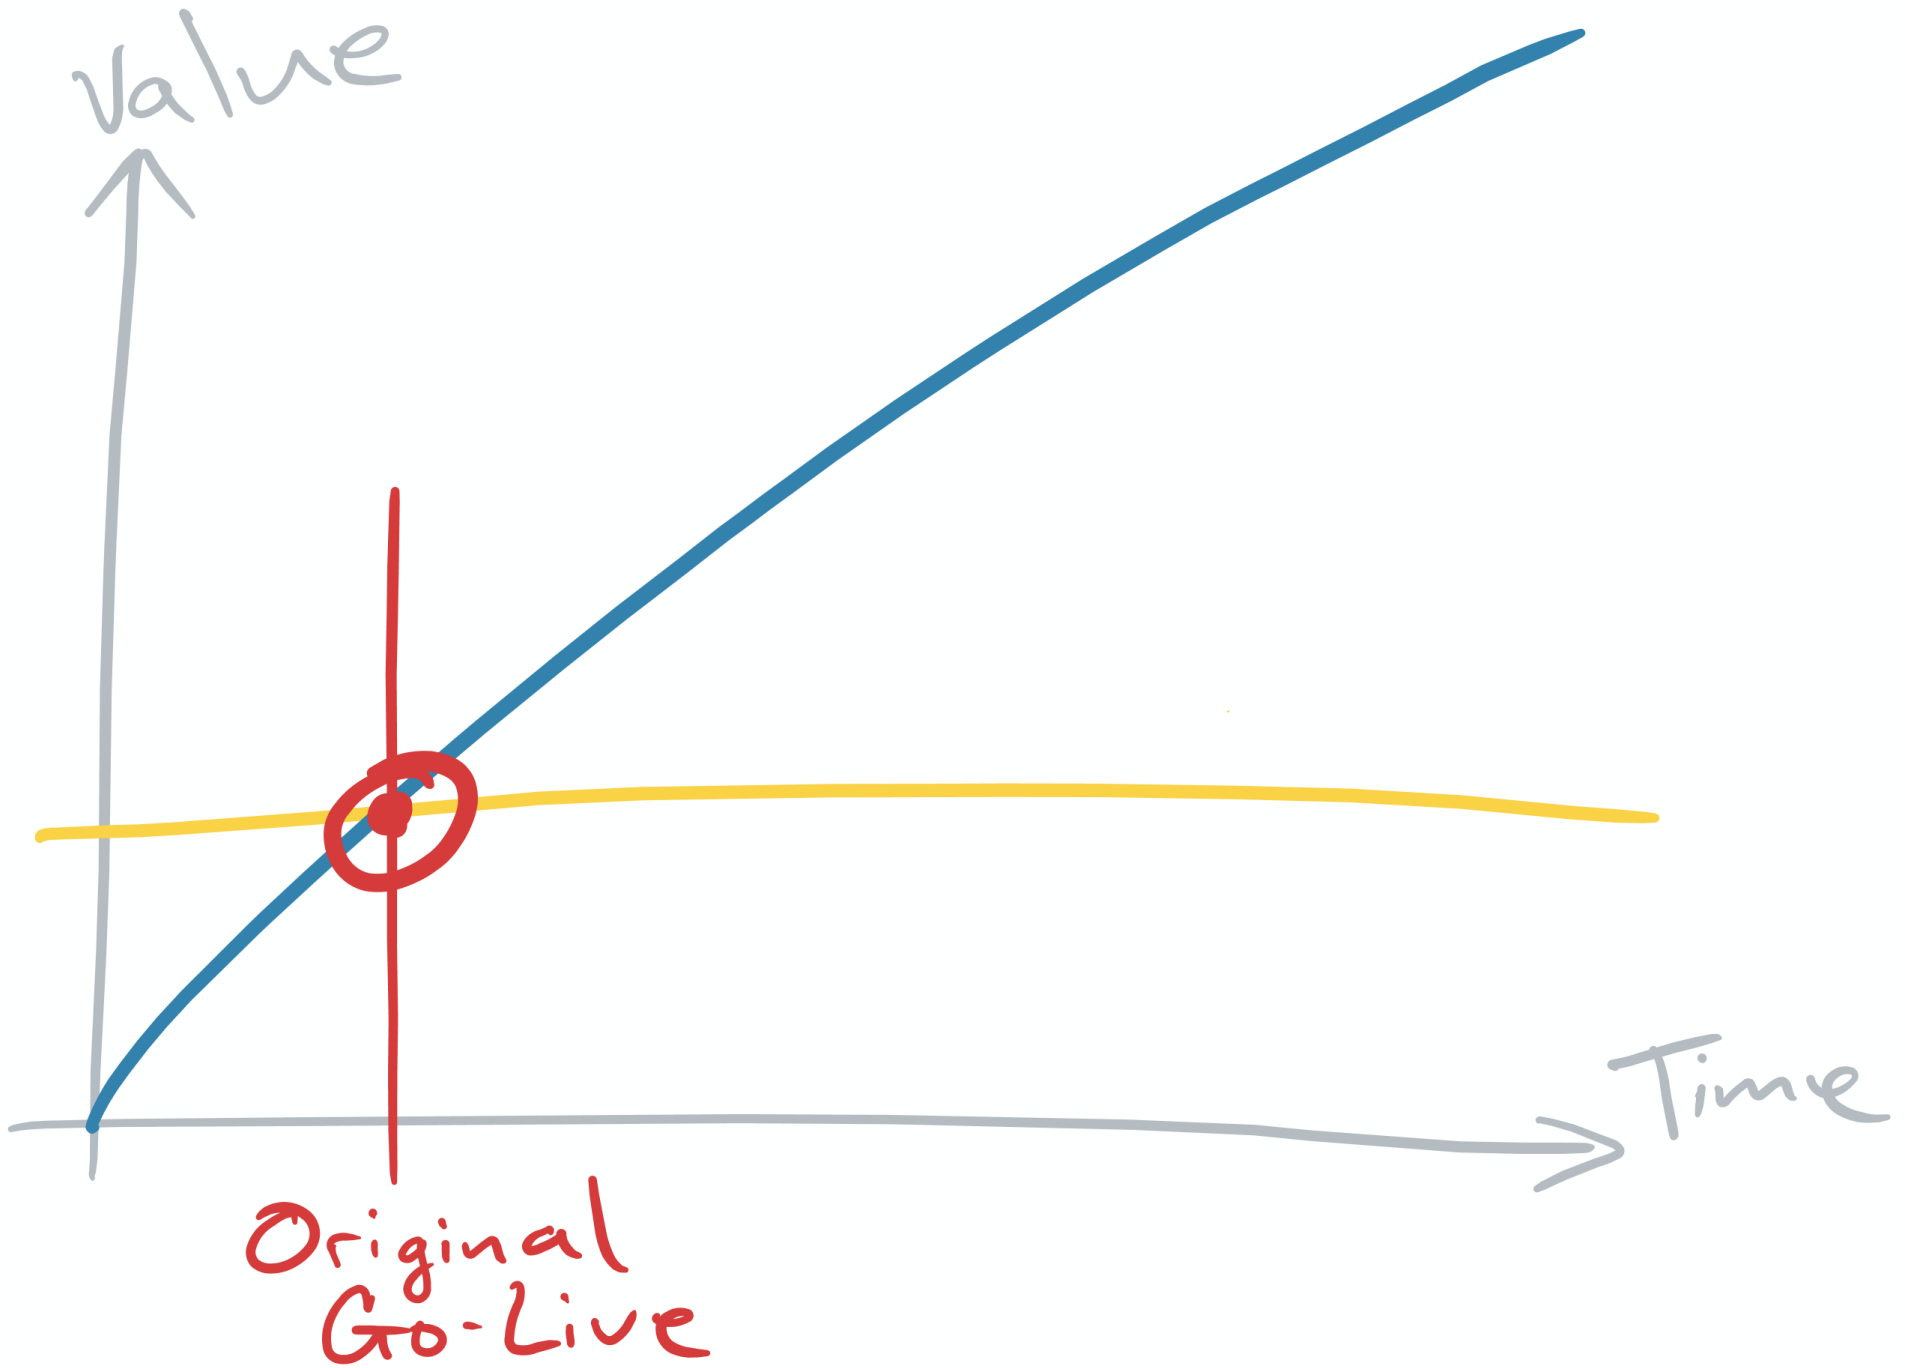

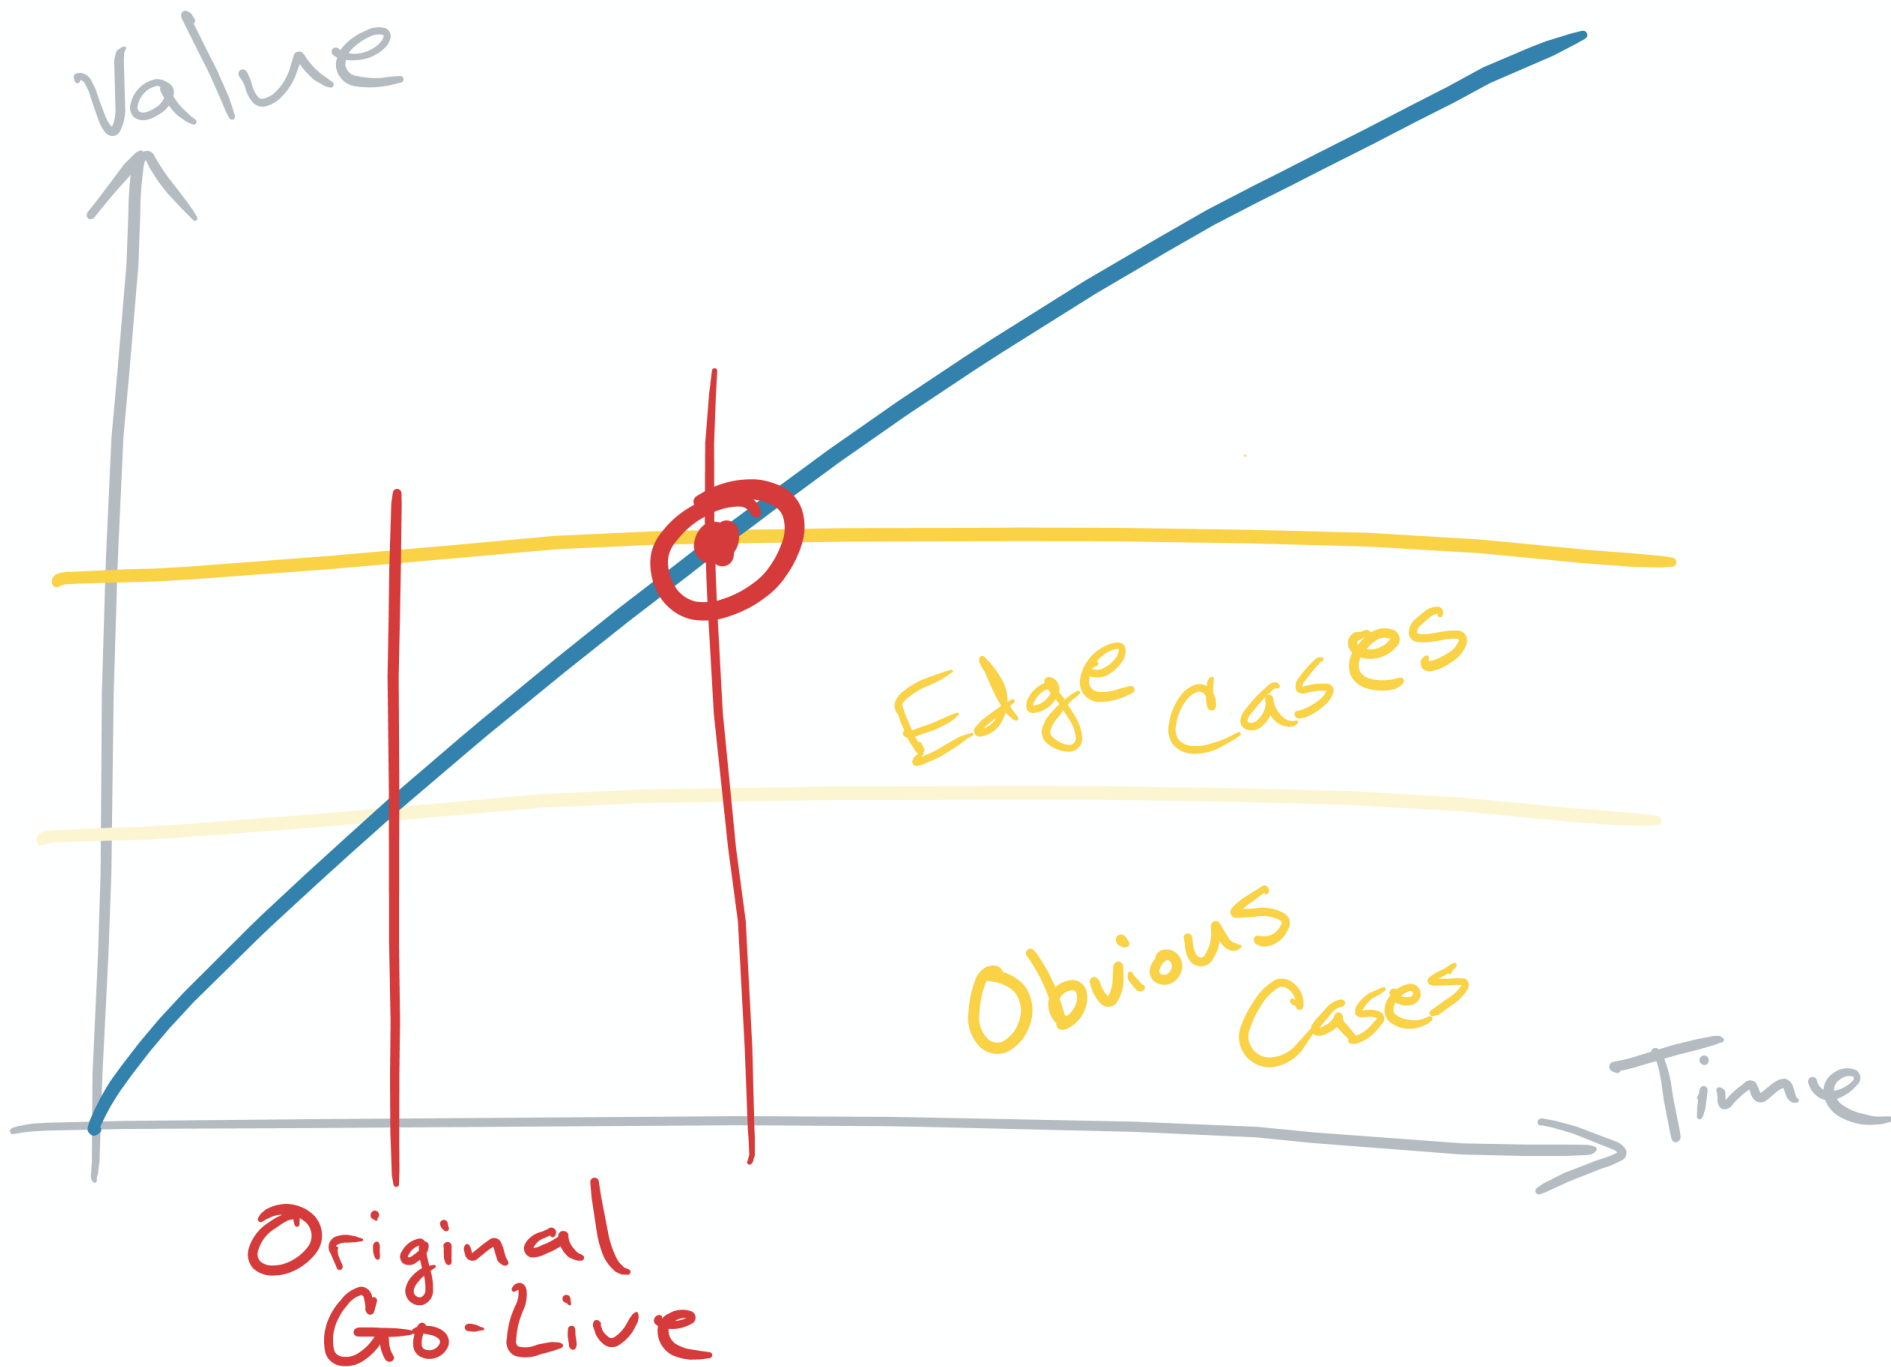

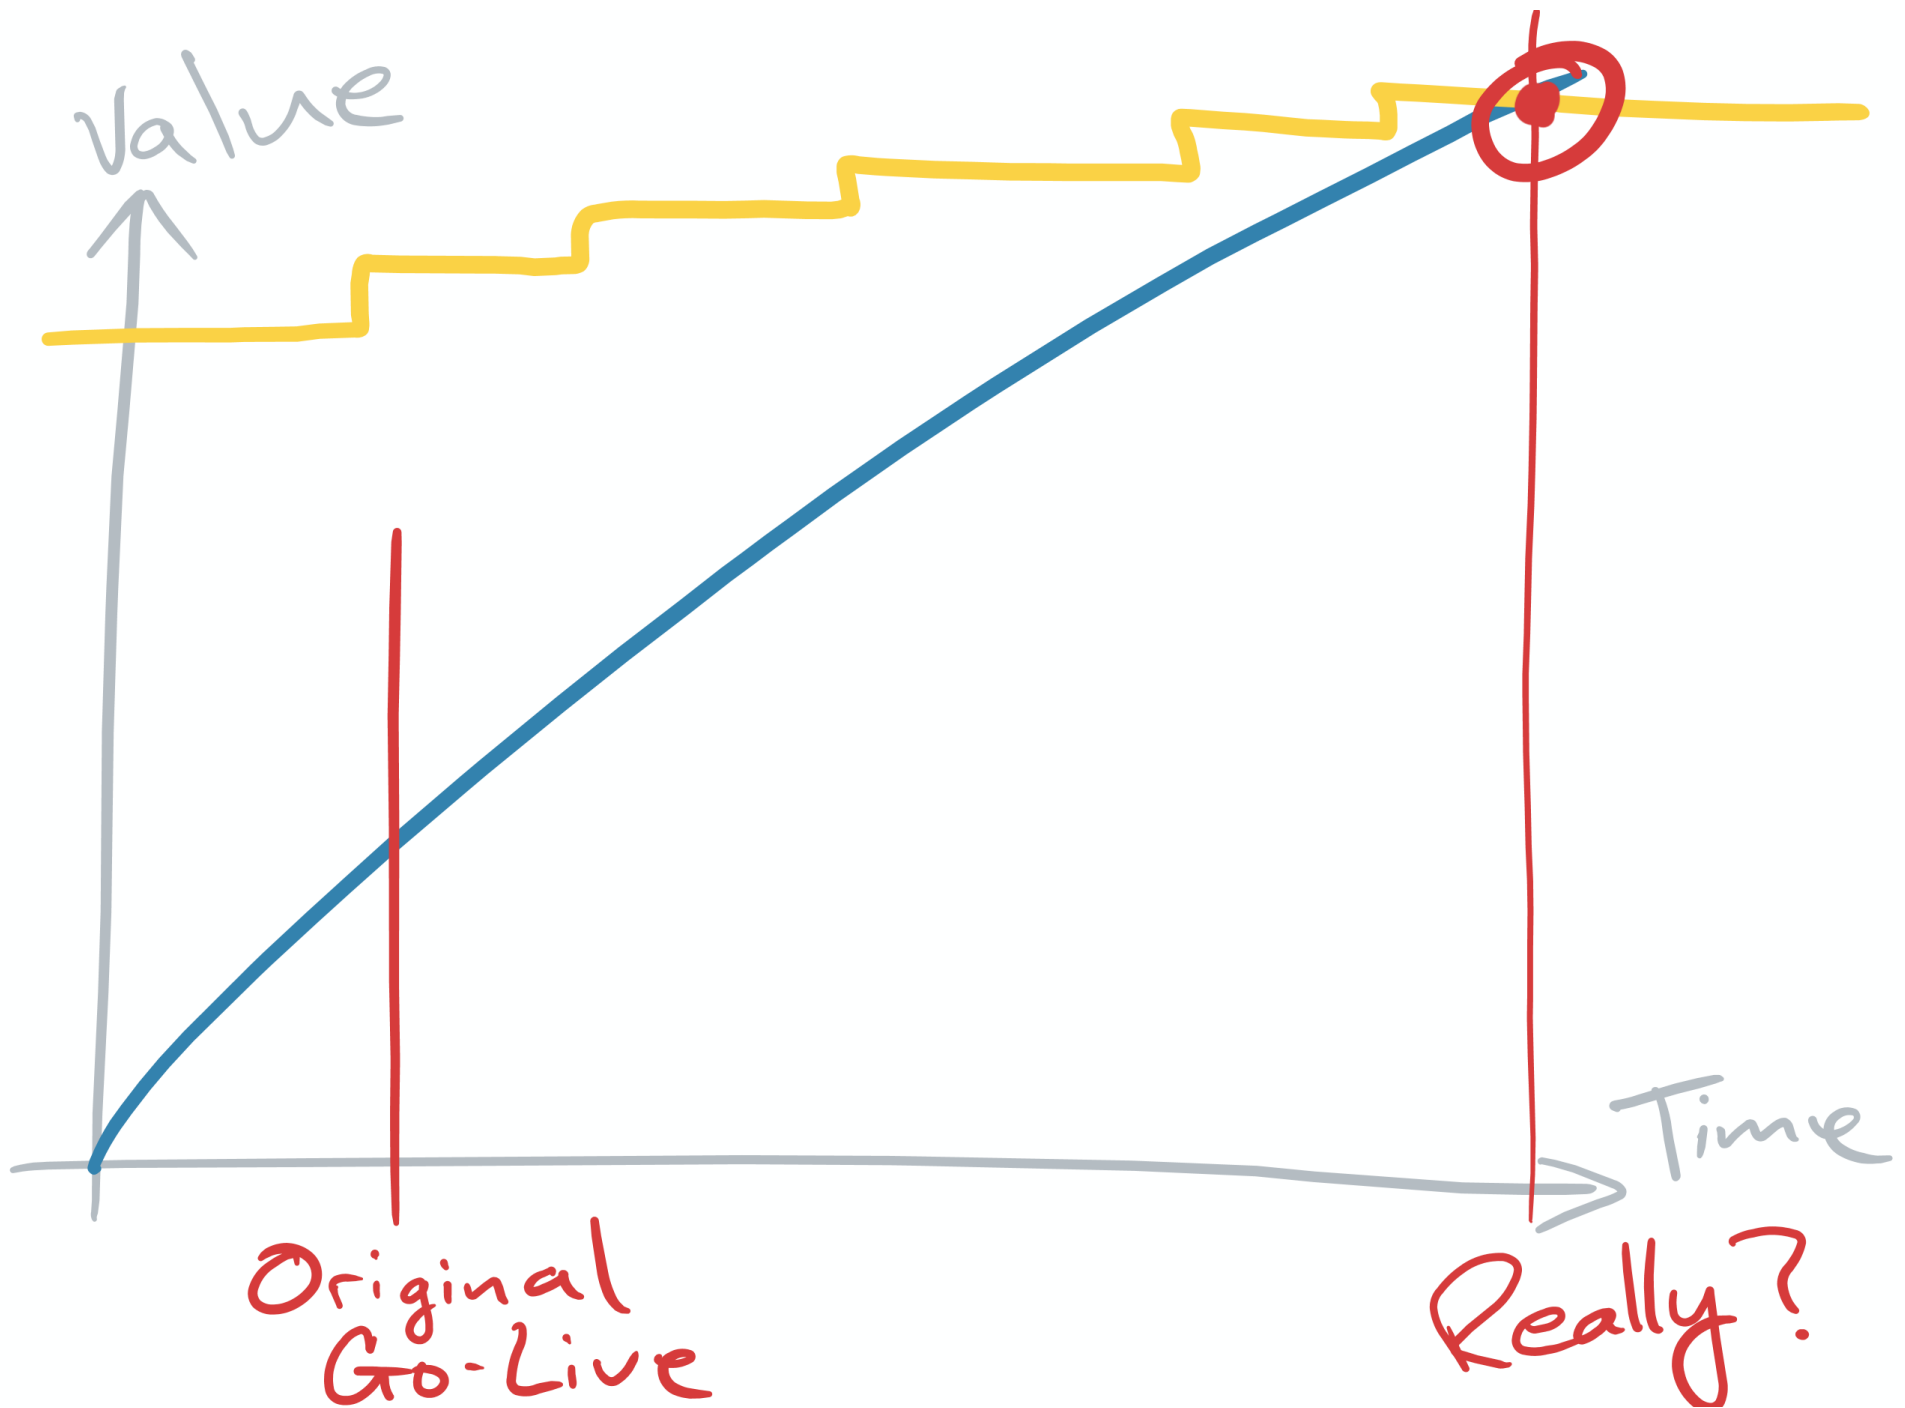

**DRAW ATTENTION TO QUALITY,
NOT JUST FEATURE DELIVERY**

More, faster metrics:

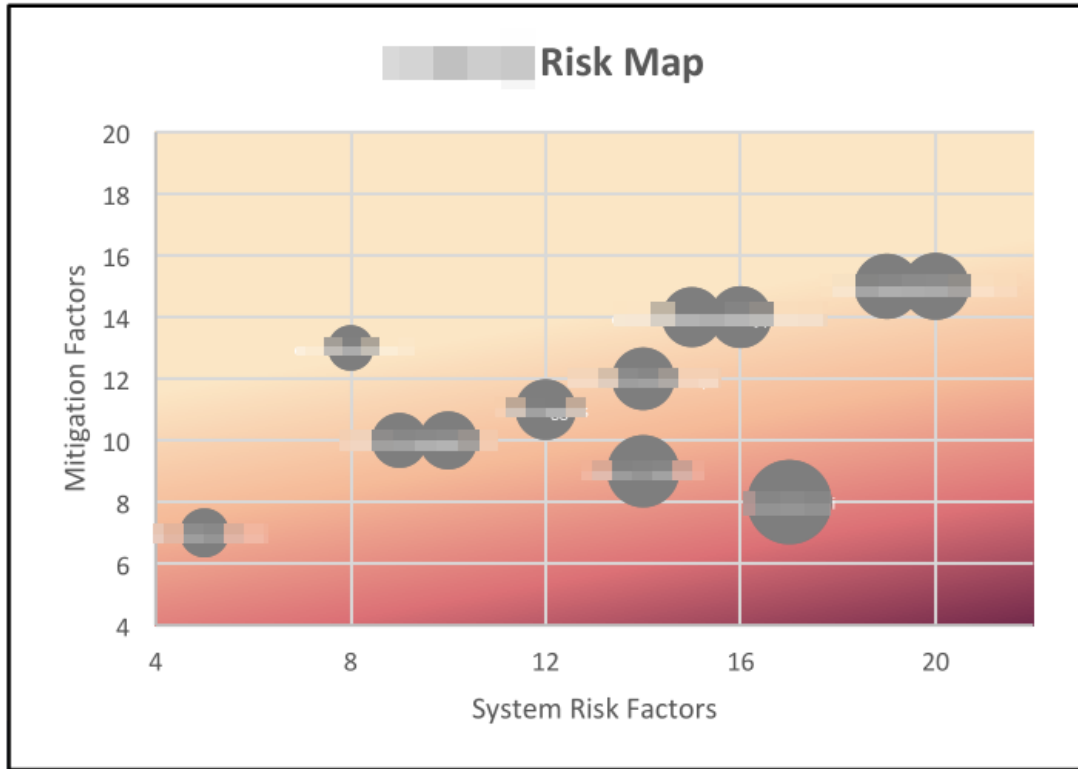

- Velocity
- Cycle Time
- Deadlines

Morale metrics:

- Niko niko
- Employee Net Promoter Score (NPS)
- Engagement and enablement surveys

Code quality metrics:

- Count of TODO comments in the code
- Code smells
- Test coverage

Maximum Risk Score:

10.6

1 week ago **10.6**

5 weeks ago **10.6**

Report Date: **10/14/18**

Microservice	Risk Score	Mitigation	Testing	Monitoring	Logging	Alerting
	10.6	25%	2	2	1	3
	7.8	31%	3	3	2	1
	6.7	69%	4	4	4	3
	6.3	69%	4	4	4	3
	5.8	50%	3	3	3	3
	5.7	63%	4	3	4	3
	5.5	44%	3	3	2	3
	5.4	63%	4	3	4	3
	5.0	38%	2	3	2	3
	4.5	38%	1	3	3	3
	3.6	19%	2	2	2	1
	3.1	56%	4	3	3	3

Dane's advice:

Balance out metrics that focus on "more, faster!" with ones that focus on morale and on code quality.

Software is weird.

1. The code is great.
2. Everything else changes.
3. The code is unchanged.
4. The code is now broken or useless.

Code doesn't rot or wear out like physical objects. So
how does this happen?

22

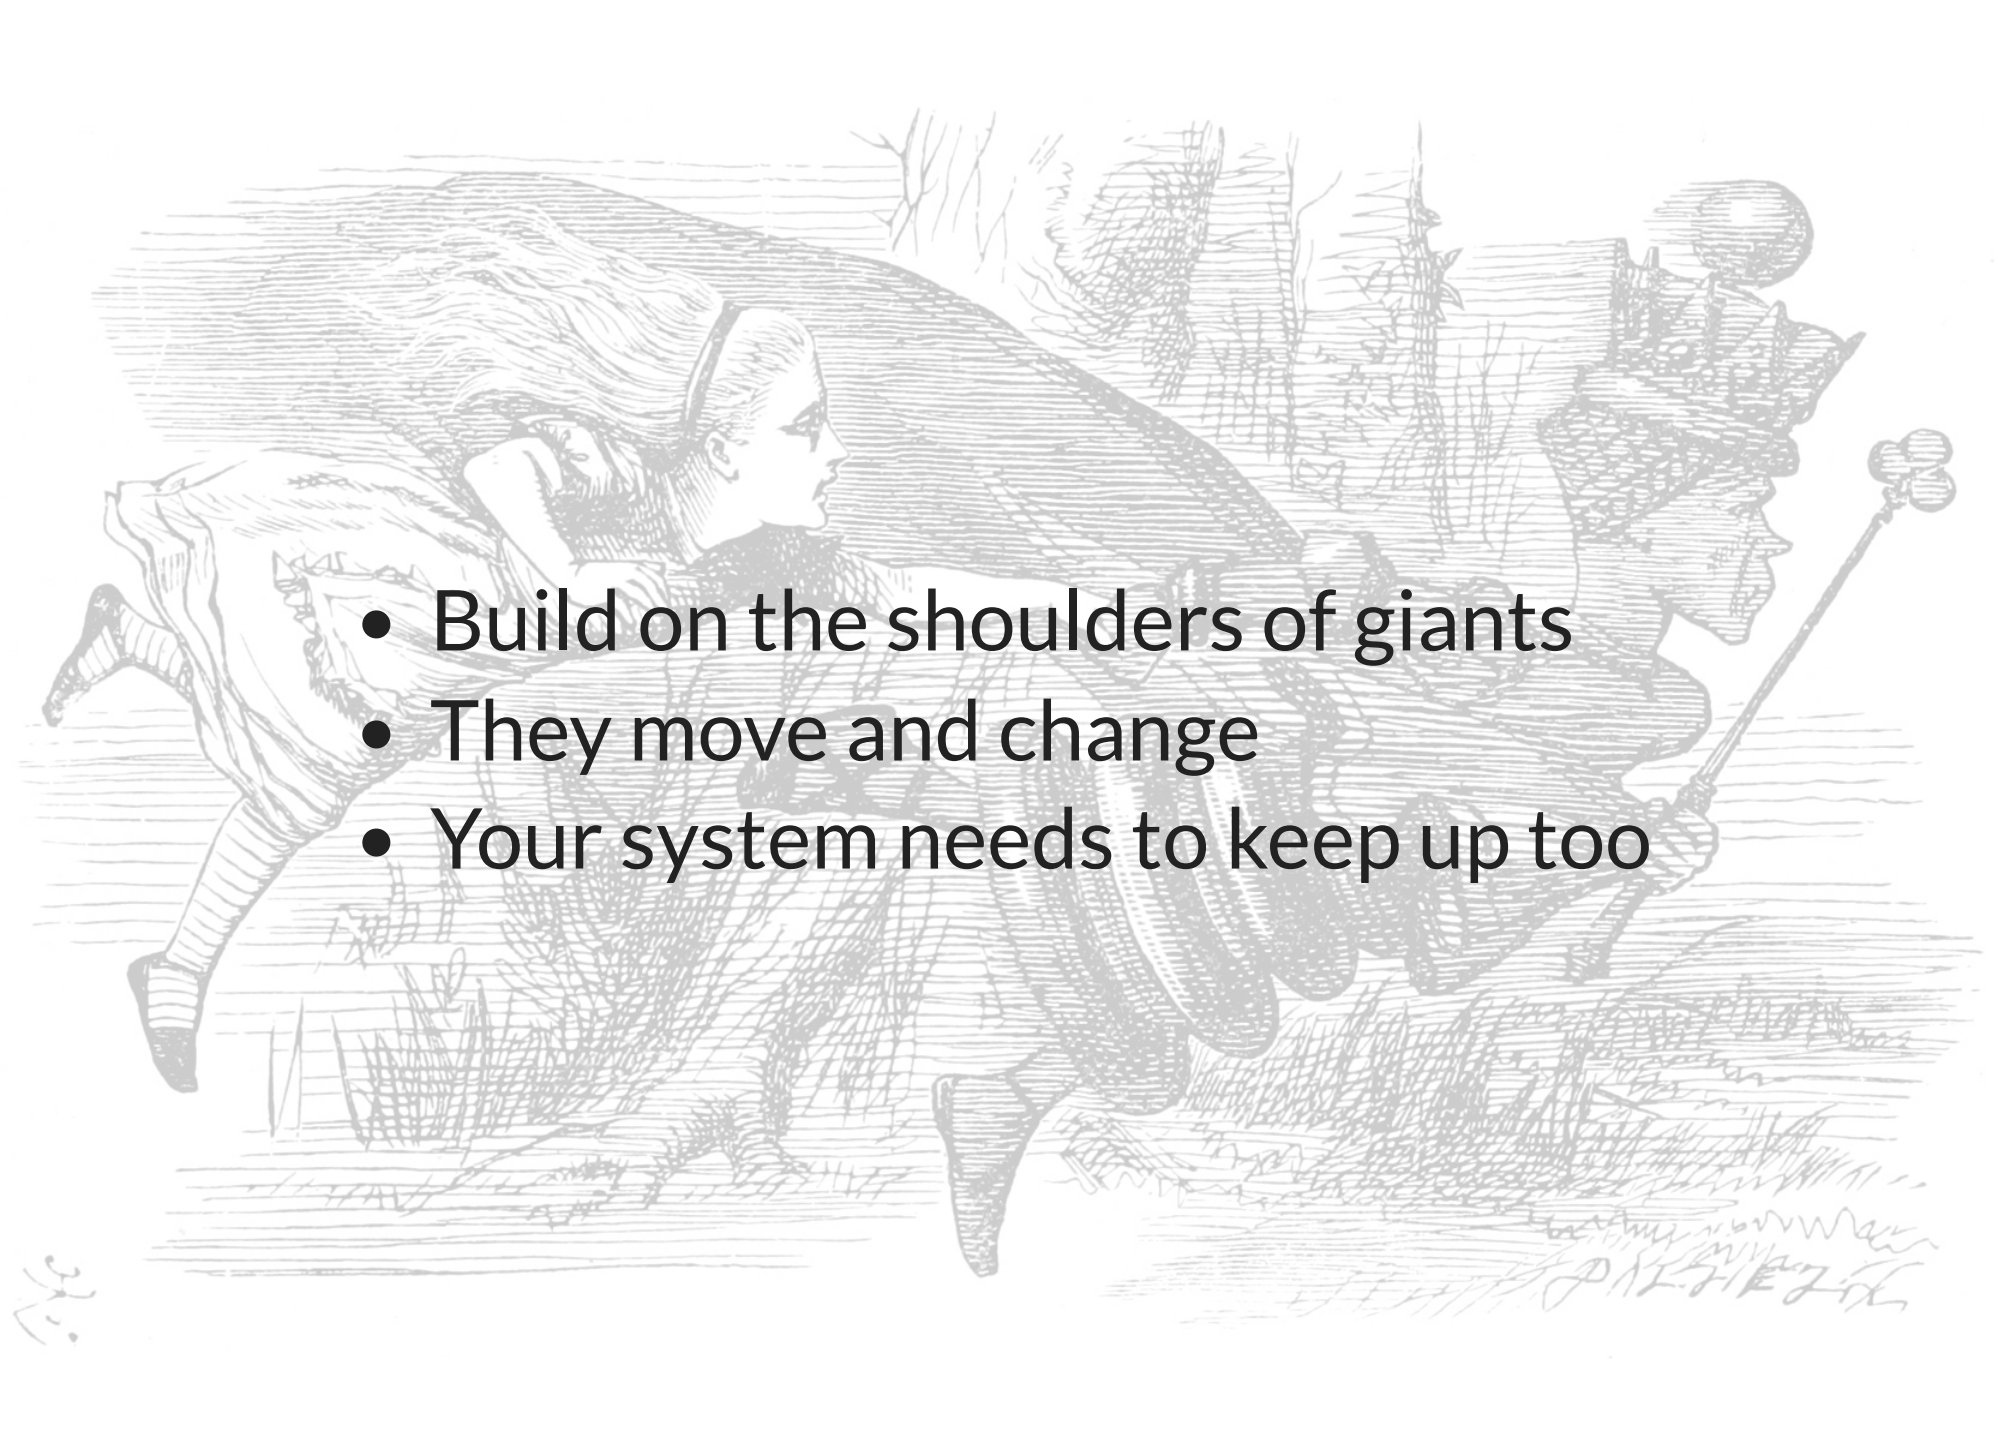

W. H. P. 7/18

RED QUEEN PROBLEM

Now, here, you see, it takes all the running you can do, to keep in the same place.

—Lewis Carroll, *Through the Looking-Glass*

- 
- Build on the shoulders of giants
 - They move and change
 - Your system needs to keep up too

*All models are wrong, but some are
useful*

- Repair
- Maintain
- Remodel

- The power company is changing voltage
- Septic has a new hookup system
- We need ethernet in the walls

Investment in maintenance, remodeling, and more

Testing (so many kinds!)

Automation for team happiness

ACTIVITY: brief discussions in groups of 3 or 4 about who currently advocates - for improving technical practices, quality, and automation on your team.

CHALLENGE

challenge

1. x

2. x

If it hurts, do it more frequently; move toward
"continuous"

TDD, even if you don't do TDD

Code is for people; is it readable?

Pair program, regardless of the terms

Buddy System

CAUTION

**BUDDY SYSTEM
IS REQUIRED
FOR ENTRY**

Take your place in the mob

Social skills are key: software projects are people projects.
